VOGUE

(Patent No. 926)

Here's a grand new introduction of the Floribunda family. Intensive brilliant, cherry-coral with perfectly formed, high centered, Hybrid Tea-shaped, 3- to 4-inch flowers. Reaching a height of 2½ to 3 ft.

Postpaid, \$2.25 each; 3 for \$6.00; 12 for \$24.00.

RA-PID-GRO

THE MIRACLE PLANT FOOD

**Formula: Nitrogen 23% — Phosphoric Acid 21% — Potash 17%
and all essential minor elements**

Here's what our customers say about this amazing miracle worker—"Ra-Pid-Gro has made our gardens the healthiest and most beautiful we have ever had. No more sick trees, roses, shrubs, perennials or evergreens. They all start growing immediately."

How to use Ra-Pid-Gro

Feed it when you plant new nursery stock, seeds or lawns. Feed it to roots and foliage throughout the growing season. Feed it to the foliage along with insecticides. You can't over-feed with Ra-Pid-Gro. It will not burn.

Ra-Pid-Gro is instantly soluble in water. One pound makes 176 pounds of liquid fertilizer—instantly available to plants.

A PERSONAL MESSAGE FROM WM. F. KELLY, JR.

Dear Friend:

Thank you for your interest in our nursery stock. This catalog has been prepared to make it easy for you to select the plants you want. When you plant Kelly's nursery stock, you are investing for the future, for our plants live and grow to make a more beautiful and fruitful America.

Many of the items in our Catalog deserve your special attention--the lovely Flowering Shrubs on Pages 45 to 53; the Crimson King Maple, new and strikingly beautiful, on page 36; the graceful Wisconsin Weeping Willow on Page 37. We urge you to go through our Catalog carefully, make your selections and mail your order promptly. As in any seasonal business, we can give more individual attention to early orders than we can to those arriving at the height of the shipping season. Your stock is reserved for you and shipped at proper planting time.

We grow the stock we sell, so we know our plants are strong and thrifty. By buying direct from the grower you save real money and get strong stock unweakened by unnecessary handling. We have been growing fine nursery stock here in Dansville for over 72 years, and have hundreds of thousands of satisfied customers. You take no risk when you buy from us. We ship only top quality stock and we guarantee satisfaction.

We look forward to receiving your order for your Spring needs, and promise you that it will receive our most careful attention. Everything possible will be done to assure you success and pleasure with your Spring planting. But PLEASE send your order early.

Sincerely,

William F. Kelly, Jr.

OUR GUARANTEE

We positively GUARANTEE any nursery stock you buy from Kelly Brothers Nurseries, Inc., to grow. If any tree, bush, shrub or plant from our nursery does not grow, we will replace it ABSOLUTELY FREE the next growing season.

All we ask is that you follow the planting instructions mailed with your order acknowledgment and give the plants good care.

Report on losses to reach us ON OR BEFORE AUGUST 1st, FOLLOWING PLANTING.

We ship only STRONG, HEALTHY STOCK OF THE BEST QUALITY. That's why we can make such an iron-clad guarantee.

We Pay Postage

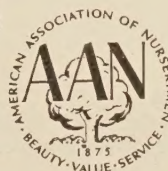

Most plants listed in this catalog are DELIVERED TO YOUR HOME POSTPAID. Plants too large to be sent by Parcel Post are sent by Express. YOU TO PAY THE CHARGES.

We are Members of:

American Association of
Nurserymen

New York State
Nurserymen's Association

National Mail Order
Nurserymen's Association

PLEASE READ BEFORE ORDERING YOUR SELECTIONS

1. Order now for shipment at planting time.
2. Unless you specify a specific date, we will ship at the proper planting time in your section.
3. An envelope on which we pay postage is enclosed for your convenience.
4. For ordering, please use order blanks enclosed. Letters should be written separately to avoid confusion and mistakes, and to insure prompt reply.
5. Our terms are NET CASH with order. Unless otherwise specified, prices are f.o.b. Dansville.
6. A 25% deposit is required on all C.O.D. orders.

HOW TO REMIT

Send Money Order or Check with your order. You save money by sending remittance with order. The Post Office and Express Company make extra charges for C.O.D. shipments.

QUANTITY RATES

Take advantage of our lower rates for quantity purchases. For less than 10 trees remit at each rate; 10 to 15 trees of one sort such as Apples, varieties alike or assorted, entitles you to the 10 rate. An order for 50 or more trees of one sort, alike or assorted, entitles you to the low 100 rate.

Use Coupon Enclosed for Ordering
Your Favorite Magazine.

RIPENING DATES

With our description of varieties, we've indicated the approximate ripening date at which fruit is ripe and ready to eat in western New York. This date will vary with the season and in different sections of the East. The fruit may ripen a few days to a week earlier or later.

OUR REFERENCES

As to our responsibility and reliability, we refer you to the Merchants and Farmers National Bank, Dansville, N. Y.; Groveland State Bank, Groveland, N. Y.; Security Trust Co., Dansville, N. Y.; to any person whose letter appears in this catalog, or to your State Experiment Station or College.

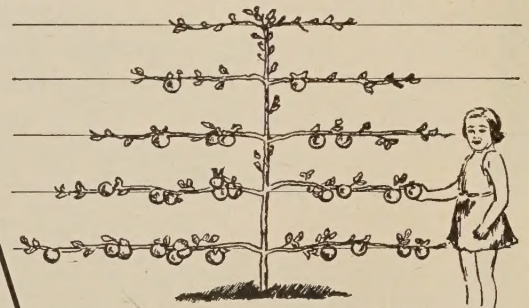

FREE PLANTING GUIDE

With every order we will send absolutely free a book which, by word and picture, shows just how to plant a tree or shrub.

ESPALIER TREES

Fruit The Second Year After Planting

Bartlett Dwarf Pear

DWARF APPLES

All Kelly's Dwarf Apple trees are propagated by placing the variety on a special type of Malling Rootstocks, which were developed in England and which are imported from that country. These trees at maturity will reach a height of 12 to 15 ft. tall and they can be planted 15 to 20 ft. apart in your home orchard. Besides being a beautiful addition to the landscaping of your home they develop crops of fruit each year. You will have much enjoyment standing on the ground picking fresh luscious fruit from these small trees within 2 years after you plant them.

Just the Thing for Small Gardens

McIntosh Dwarf Apple

The Wonder Plum of the Age

HOWARD'S MIRACLE PLUM

The introduction of this new Plum into commerce, marks an epoch in the advance of fine fruits for the table. Its tantalizing and delicious flavor, great size, firm amber flesh, together with a delightful color, place the "Miracle Plum" in a class by itself. An astounding surprise to the palate, flavor not unlike Nectarine, Peach and Plum mixed; skin thin, and unnoticeable when eating fruit. Keeps well, delicious in preserves, fruit ripens over long period during July and August. Fast growing and quick bearing. Will bear fruit second year after planting. Beautiful ornamental tree of medium size, richly tinted foliage in autumn like the leaves of a Maple. Tree hardy where the temperature does not go below zero. Can be grown in a small garden.

3-5 ft. trees, \$2.00 each, postpaid.

NEW RED LEAF PEACH

The Sensational New Ornamental

Something entirely new in an ornamental. Bright red foliage appears early in the spring, changing gradually to deep maroon towards fall. Deep rose blossoms contrast beautifully with the colorful foliage. This sensational tree produces a full crop of small perfectly round Peaches, about 1½ inches in diameter. They are especially fine for pickling—flesh is white and has a delicious sweet flavor. Fruits have an over-all red color slightly splotched, and ripen quite late. A planting of these trees will provide year-around interest and pleasure.

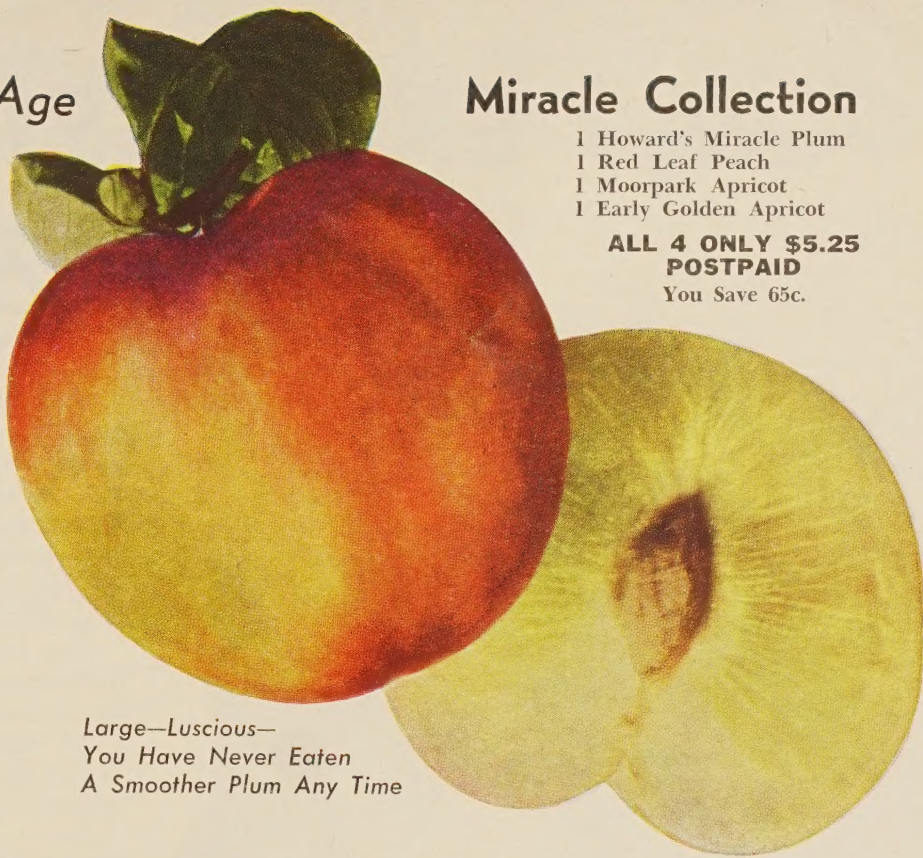

Price: 4-5 ft. trees, \$2.25 each, 2 for \$3.95, postpaid.

GOLD-TONED Apricots

MOORPARK. You'll like this attractive variety. High quality and fine flavor. Fruit is large, deep yellow, with a red cheek. Grows to about the same size as a Peach tree. Ripens mid-August.

EARLY GOLDEN. A new freestone variety which possesses a fine flavor. Skin is smooth, fuzzless and pale orange in color; medium to large in size; makes an excellent variety to plant with Moorpark.

Plant 2 Varieties for Pollination.

See pages 21 and 22 for description of varieties.

Root Pruned, Specially Grown Trees Ready for Transplanting

Golden Jubilee Peach

APPLES Hardy Northern Grown Trees for Prolific Crops of Quality Fruits

Whether you have room for only a few trees in your back yard, or plan to plant a large orchard . . . you'll get best results with **Kelly's Apples**. We say this with confidence, because **our trees are grown under the most exacting conditions for your protection!** Starting with a whole root seedling our trees are propagated by the budding method . . . the best and most expensive way. Each year we go direct to commercial bearing orchards to cut our bud wood from trees that show best color and bearing qualities. This is what gives **Kelly's Trees** the good foundation that assures you of permanent, healthy growth, disease-free trees, and heavy crops year after year.

SUMMER APPLES

Months listed after description indicate the time at which the fruit is at its best for general use. Dates indicate time of ripening.

RED DUCHESS. A solid red strain of the old Duchess of Oldenburg. One of the hardiest varieties grown. Fruit is large, striped red in color. A good, early eating Apple. Vigorous grower. Regular and prolific bearer. Excellent for pies and sauces. August 5-10.

RED ASTRACHAN. One of the best summer varieties, as it becomes fully ripe and ready for home use from late July to August. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good though rather acid. Tree medium size, yielding good crops. August 2-6.

FALL APPLES

EARLY McINTOSH. See page 9 for description and illustration.

WEALTHY. Beautiful, moderate sized, brilliant red Apple; fine quality. One of the best of its season. Is relatively a good keeper. Owing to hardiness of the tree, its adaptability to cold climates and early bearing habits, can be profitably planted as a filler. September 15-20.

YELLOW TRANSPARENT. Fruit of good size; skin clear white turning to pale yellow; flavor acid and very good, making it excellent for cooking. Begins to ripen some time in July and continues for 3 or 4 weeks. Tree upright and a very early and abundant bearer. August 3-7.

**3
GOOD
APPLES**

- 1 Lodi.** A new fruit that closely resembles one of its parents, Yellow Transparent, but the fruits are larger and ripen a little later. An annual bearer that is becoming a commercial variety. August 10-15.
- 2 MILTON.** Bright pinkish red, large, flesh tender, very white and a refreshing aroma. An early and annual bearer. Excellent for home and roadside markets. September 15-20.
- 3 RED GRAVENSTEIN.** New red sport, much more attractive than its parent. Differs from old Gravenstein, being solid dark red in color, is a better keeper and hangs better on the tree. September 10-15.

MASSACHUSETTS TRUENESS-TO-NAME INSPECTION SERVICE

Sponsored by The Massachusetts Fruit Growers' Association

Statement of Inspection for Trueness-to-name

Amherst, Mass.

August 9, 1951

TO WHOM IT MAY CONCERN:

All of the Apple, Pear, Plum, Sweet Cherry, and 2-year Sour Cherry varieties propagated and now growing in the nurseries of Kelly Brothers Nurseries, Inc., Dansville, New York, have been examined by the Massachusetts Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

KELLY'S

Apple Trees-

Red
McIntosh

RED McINTOSH

(Solid Red Strain.) Without doubt the leading commercial variety of New York and the New England States. A very attractive red Apple of the highest quality. Hardy, bears young and annually. Flesh white, fine, very tender, juicy and refreshing, with attractive flavor. It is especially desirable for fancy trade. October-January.

CORTLAND

An Apple of the McIntosh type that combines the high quality and flavor of the McIntosh, and tendency to hang to the tree of the Ben Davis. An excellent variety to plant with McIntosh as a cross pollinator. The fruit of Cortland is as large or larger than that of McIntosh, round to somewhat conical in shape. In color it is a bright red, splashed and striped with carmine and overlaid with purplish bloom. October-February.

RED DELICIOUS

A large, dark red Apple, with crisp, fine-grained flesh of excellent quality and flavor; a splendid keeper and shipper. Tree one of the hardiest. A regular annual bearer. Excellent for eating and the most popular fruitstand Apple. Packs well in boxes and bushels always bringing high prices on the leading markets. December-March.

For Kelly Customers

DAVEY

(Plant Patent 906.) Here is a new Apple you cannot be without. A seedling of McIntosh developed in the orchard of S. L. Davenport, North Grafton, Massachusetts. It has been tested in all of the New England States and proven hardy. Comes into bearing at an early age, and tends to bear annually. Has been found to be much more resistant to scab and other diseases than is the McIntosh. Blossoms about the same time as McIntosh and matures with Baldwin. The flavor is unlike any other Apple, white flesh, the quality is superior to many of the popular varieties of the day. Texture resembles that of Wealthy, is much firmer, and a little coarser. Most attractive high color, with conspicuous dots. A good shipper and easy to handle.

2-year, 4 to 6 ft. trees: \$2.50 each; 3 for \$6.50; 10 for \$19.95.

Our Supply is Limited This Year,
Maximum Order 10 Trees to a Customer.

Healthy • Heavy Bearing • True-to-Name

WINTER APPLES

Months listed after descriptions indicate the time at which the fruit is at its best for general use.

BALDWIN. Long a favorite with commercial orchardists. Yields large crops and is an excellent shipper. Highly regarded as an eating and cooking Apple, having a flavor all its own. Fruit is large, bright red, crisp, juicy and rich. December-March.

DOUBLE RED DELICIOUS. Very fine colored solid red strain of Delicious, resembling its parent in all characteristics except color. November-March.

MACOUN. A late McIntosh type Apple ripening about 10 days later than McIntosh. Dark red with whitish, close-grained flesh. Fine quality. A heavy and regular bearer. Introduced and recommended by the New York State Experiment Station. November.

NORTHERN SPY. Easily ranks among the very best winter Apples. Fruit is large, very attractive, being of bright red color with a pronounced bloom. Flesh is juicy, crisp and excellent for dessert or culinary purposes. Brings high prices on the market. Keeps well in storage until April or later. November-April.

RED SPY. A new red sport identical with Northern Spy, except that the fruit is a solid bright red without either stripe or splashes. Much handsomer than its parent. An excellent commercial sort. Tree is hardy and productive. November-May.

RHODE ISLAND GREENING. As a cooking Apple it is unsurpassed, and as a dessert fruit of its season, has few equals. It is a good keeper but keeps better if picked early. This Greening is a beautiful yellow color when ripe and an abundant yielder. Tree is long-lived and hardy. December-April.

ROME BEAUTY. Yellow and red striped Apple of excellent quality. Prolific annual bearer. Early bearer and good keeper. Profitable commercial sort for New York, Ohio, Pennsylvania, and West Virginia. December-May.

STAYMAN. Tree moderately vigorous. Comes into bearing young. A reliable cropper. Medium to large size fruit. Slightly striped. Coloring to dull red. December-March.

YELLOW DELICIOUS. See illustration and description below.

Monroe

A Grand New Apple

FROM THE NEW YORK STATE EXPERIMENT STATION

Named and introduced for trial in 1949. Tree upright-spreading, vigorous and an annual bearer. Fruit large, roundish-conic; color similar to Jonathan, its maternal parent. Flesh yellowish, crisp, juicy and mildly subacid; quality good. Winter Apple that offers possibilities for dessert and culinary uses. Supply limited—Order today.

1-Year Trees

Growers interested in quantity lots are asked to please send us their list for special quantity prices.

To insure cross-pollination be sure to plant two varieties of Apples.

YELLOW DELICIOUS

A bright, golden yellow Apple of excellent quality. Firm, crisp, and very juicy. Splendid keeper. Bears young and heavily. Many growers say this is the finest yellow Apple. October to April.

RED ROME

A new sport of Rome Beauty, and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color. December-May.

EARLY McINTOSH

For home orchard or commercial use this is the ideal early variety to plant. Resembles its McIntosh parent with its handsome red color and uniform, round shape. The tree is a vigorous grower, hardy and productive. Tends to be a biennial bearer, although for annual crops early thinning is recommended. It comes into bearing at an early age. The flesh is white, tender and juicy with fine flavor. August 15-25.

ANSWERS TO 43 QUESTIONS

Most Commonly Asked by the Average Person Buying Nursery Stock

Compiled by our staff in co-operation with Dr. H. B. Tukey, formerly of the Geneva, New York, Experiment Station and other Fruit Experts at the station.

Please read before ordering or asking for information.

If your question is not answered here, write on a sheet of paper separate from the order blank.

Additional planting and cultural information is contained in the Planting Guide we send you free.

1—Q. When is the best time to plant nursery stock?

- A. Either fall or spring, though early spring is preferred by many. Fall delivery season starts about October 15 and extends through the severe freezing of the ground. Spring delivery season starts March 15 and extends to June first. In our modern cold storage, we can keep plants dormant until the latter date.

2—Q. How long before my fruit trees will bear some fruit?

- A. This depends on the variety and root stock, but on the average we have found the following to be quite true:

2-Yr. Apples:	After Planting
Cortland	2-3 years
Early McIntosh	2-3 years
Red McIntosh	3-4 years
Northern Spy	5-7 years
2-yr. Pears	3 years
2-year Plums	2-3 years
2-yr. Sour Cherry	2-3 years
2-yr. Sweet Cherry	3-4 years
2-yr. Quince	1-2 years
1-yr. Peach	2-3 years

3—Q. If I plant Asparagus in the spring (example) 1952 when can I harvest the first crop?

- A. You could cut some Asparagus in 1953, but the first big crop would be in 1954.

4—Q. Can I grow Quinces and Apricots?

- A. Generally speaking, Apricots, though not a commercial crop in the East, will grow where Peaches do well. If you can grow Sweet Cherries, Quinces will grow there.

5—Q. Will you tell me how to spray my trees and what to use?

- A. Please refer to page 27.

6—Q. Should I fertilize my trees or put manure in the holes at planting time?

- A. Fertilizers are of no value until the roots are established and growing, thus being able to absorb the nutrients. Manure is best used as a mulch on top of the ground well back from the main stem. It may severely injure the tree, if placed directly in the tree hole. Wet peat moss or similar material mixed with the soil at planting time (1 part of peat moss to 4 parts of soil) makes an ideal combination for loosening up the soil.

7—Q. What are Mazzard roots?

- A. Mazzard is used to differentiate this type of root stock from Mahaleb. Briefly Mazzard is the wild Sweet

Cherry and produces a long-lived tree which grows larger than the Mahaleb and comes into bearing a little later, and is not so hardy. Mahaleb is the perfume Cherry of Europe and produces a tree smaller, earlier fruiting and hardier. Mahaleb is the most commonly used root stock. (We charge a premium for trees on Mazzard roots because they are more difficult to grow.)

8—Q. What varieties are best for me to plant?

- A. All the varieties we list are tried and tested. Therefore, your choice is dependent on the type fruit you want and the ripening season desired. Your State College or Experiment Station will also be glad to supply recommendations for your particular section and soil condition.

9—Q. How do I take care of my Boysenberry plants?

- A. Set the plants as we suggest in the planting guide sent with all orders. Let the canes trail on the ground the first year. Then they should be tied to a trellis the spring of the second year.

10—Q. Can I plant Apple trees next to other fruit trees, such as Pears and Peaches?

- A. The orchard can be mixed just as you want it, although many practical gardeners prefer to segregate the different kinds for convenience in spraying and general culture.

11—Q. How close must my trees be for proper cross-pollination?

- A. Individual trees not over 500 to 1000 feet apart will be satisfactorily cross-pollinated, if the weather at blossoming time is warm enough for bees to be active. In solid blocks of closely planted trees, however, pollinizers should be provided every third or fourth row for best results.

12—Q. Are Dwarf Apple Trees practical for commercial planting?

- A. From experimental data now available, we have every reason to believe that dwarf trees will be a success in commercial orchards.

13—Q. How can I tell if my soil is sufficiently acid for Blueberries?

- A. Soil having an acidity testing between pH of 4.4 and 5.0 is considered best. If you cannot have your soil tested locally, send a sample to your State Experiment Station (see list at right above) and they will test it for you. Also see page 27.

14—Q. Where is my State Experiment Station?

Connecticut	New Haven
Delaware	Newark
Illinois	Urbana
Indiana	Lafayette
Kentucky	Lexington
Maine	Orono
Maryland	College Park
Massachusetts	Amherst
Michigan	East Lansing
Missouri	Columbia
New Hampshire	Durham
New Jersey	New Brunswick
New York	Geneva
North Carolina	Raleigh
Ohio	Wooster
Pennsylvania	State College
Rhode Island	Kingston
Vermont	Burlington
Virginia	Blacksburg
West Virginia	Morgantown
Wisconsin	Madison

15—Q. Will the Roses and shrubs I plant this spring bloom this summer?

- A. The Roses will bloom profusely all summer. Be sure to trim them at planting time as we direct in the planting guide. Many shrubs will also bloom the first year but some which form flowers only on two-year wood may not blossom until next year.

16—Q. What can I do to prevent rabbit and mouse injury?

- A. Keep the area about 12 inches around each tree cultivated; put cinders at the base of the tree, and clean up any nearby trash or brush where rabbits and mice may harbor. Hunt the rabbits and destroy them and poison mice according to recommendations available to you from your Experiment Station. Use "No-Nib!" listed on page 27.

17—Q. What shade tree will grow the fastest, provide suitable shade and look good?

- A. Our recommendation is the Chinese Elm, illustrated and described on page 37. Like many of the soft wood trees, it is, however, subject to splitting from heavy load of ice and sleet, if the trees are not kept properly trimmed.

18—Q. Are English Walnuts and Filberts hardy where I live?

- A. When we have winters like those of 1933-34 and 1942-43, the trees might be injured, if they are not in a particularly sheltered area. Generally they will succeed where you find Peach trees growing.

19—Q. What size trees do you recommend?

- A. We recommend the largest size and grade. After all, the first price paid for the tree is the cheapest part of the investment. However, all the trees and plants we offer are up to grade and A-1 quality.

20—Q. Why don't you sell trees older and larger than those listed in your catalog?

- A. Older and larger trees do not transplant so well and are difficult for the planter to handle. Also the cost per tree is higher than the average buyer cares to pay.

21—Q. If I use commercial nitrogenous fertilizer such as Nitrate of Soda or Sulphate of Ammonia, how much should I use?

- A. Generally $\frac{1}{4}$ lb. per each year of age in the orchard. Example: A tree planted for four years would require 1 lb. Make application out under the drip of the branches. Preferably in early spring, just as the growth starts.

22—Q. Will fruit trees grow where the soil is poorly drained?

- A. No fruit tree will grow well where the soil is too wet. Cherry trees in particular will not tolerate the least amount of excess water. On the other hand, Plum and Prune are much more tolerant and will thrive where many other fruit trees would fail. We list them as follows in order of tolerance to wet soil: Prune, Plum, Pear, Apple, Quince, Peach, Apricot, Cherry.

23—Q. Should I trim my trees when planting them?

- A. It is most important that the pruning be done as we suggest in the planting guide sent with each order. Trees and plants set out in the fall, however, should not be trimmed until early spring.

24—Q. Which kind of fruit trees are hardiest?

- A. Apple, Sour Cherry, and Pear are most hardy. Peach, Apricot, and Sweet Cherry are least hardy.

25—Q. Do you guarantee your trees and plants to grow?

- A. Yes. See our liberal guarantee on page 3.

26—Q. How deep should I plant my fruit trees and Raspberry bushes?

- A. All stock should be planted slightly deeper than it stood in the nursery row. We explain the procedure by description and illustration in the planting guide mailed with your order acknowledgement.

27—Q. My trees blossomed but no fruit was produced. What is the trouble?

- A. The blossoms could have been killed by early frost or the fruit bearing part of the blossom could have been destroyed by winter cold. Most failures of this kind, however,

are due to lack of proper pollination. (See comments on pollination in our catalog.)

28—Q. How many Strawberries, Raspberries, Grapes and Blueberries, and Asparagus should I plant for the average requirement for a family of five?

- A. This will depend upon the family appetite for fruit.
Strawberries 25 to 200 plants; Red Raspberries 10 to 50 plants; Grapes 3 to 10 plants; Blueberries 3 to 10 plants; Asparagus 50 to 100 plants.

29—Q. I have several trees 15 years old. How can I keep them from getting too big?

- A. After the trees have begun to fruit, you can hold them down by pruning the top heavily. Make a few large cuts, always pruning to an outside lateral branch so as to reduce sucker growth.

30—Q. Will the Strawberry and Raspberry plants I set this spring produce this year.

- A. Ordinarily they will blossom and fruit. However, to increase the bearing surface for a big crop the next year, it is best to remove the blossoms the first season, except from Everbearing varieties.

31—Q. Why don't you sell 2-year Peach trees?

- A. Peach trees get large enough and are sufficiently well branched in one year, the way we grow them.

32—Q. When will dwarf trees bear?

- A. They should have a few fruits the second or third year. Production of blossoms or even fruit the first year is not unusual.

33—Q. How can I keep borers out of my tree?

- A. Peach tree borer can be controlled by chemical treatment. Write to the New York State Experiment Station(Geneva, N. Y., for their Free Circular No. 172 that gives complete directions. Apple tree borer is difficult to control but it is much less prevalent where young trees are regularly sprayed. See Question 5. If the tree is already infested the best you can do is to dig the borers out with a knife or wire.

34—Q. Do you sell Black Currant bushes?

- A. No, because Government quarantines prohibit their propagation since they are the host plant for rust diseases.

35—Q. How far apart must I plant black and red Raspberries and Blackberries from each other to prevent mixing or crossing?

- A. All kinds of Raspberries and Blackberries may be planted in adjoining rows without mixing or crossing in the sense in which the question is asked.
Black Raspberries sometimes get a

mosaic disease from certain red varieties and it is advisable to keep them apart. Indian Summer, Marcy and Milton are safe, as they rarely have mosaic. Columbian purple has mosaic which will spread to and destroy black Raspberries. (We offer Sodus Purple, see page 33, which is mosaic free.)

36—Q. Will a dwarf Pear tree pollinate a standard Pear tree?

- A. Yes, so long as the varieties are different, pollination is accomplished whether the trees are standard or dwarf.

37—Q. How many Apples will a dwarf tree produce?

- A. This is, of course, dependent on many conditions, such as the soil and the care which the trees receive. Under average conditions, however, the dwarf Apple tree, four to six years old, would produce from two to four bushels of fruit.

38—How long does it take a 5-N-1 Apple to produce fruit?

- A. Under normal conditions, one could expect fruit in from three to four years' time.

39—Q. What preparation is necessary for planting trees?

- A. For best success it is necessary to work the ground up in a mellow condition just as you would fit it for planting garden vegetables. Refer to our Planting Guide for complete information.

40—Q. What yields may be expected from an acre of Raspberries?

- A. A fair yield of Red Raspberries is 2,000 to 2,500 quarts per acre, and measured yields of more than 4,000 quarts have been produced by some growers. Black Raspberry yields should run somewhat higher than Red Raspberries. Purple Raspberries should outyield either black or red by a considerable margin.

41—Q. Why do the leaves on my Lemon or Gardenia plants turn yellow?

- A. This indicates lack of plant food or too much water. Recommend you fertilize about once a month with Ra-Pid-Gro. Water plant from bottom by placing pot in pan of water—do not keep too moist. Wash plant occasionally with a soapy solution made by dissolving ivory soap.

42—Q. Is it necessary to plant two varieties of Strawberries to insure cross fertilization?

- A. No. All varieties we are offering are perfect flowering and require no other kind to insure fruit.

43—Q. What is wrong with my Blueberries—they are alive but have made no growth or produced berries?

- A. No doubt your soil lacks acidity and moisture. Soil should test at least 5 pH. If not, the addition of Sulphate of Ammonia or acid peat will tend to create acidity. Be sure your plants have plenty of water.

The NEW Fowler

This new Peach was first developed by Mr. George R. Fowler of Marlboro, N. Y., several years ago. Awarded Patent No. 567 in 1943. It is a large, yellow Peach of the Elberta type, very hardy. Tree of vigorous growth and exceptionally disease-resistant. Fruit matures a week later than Elberta, ripening evenly. Firm, thick-skinned and an excellent shipper. Fine flavor and practically fuzzless. Thoroughly tested and sure to be a widely planted variety for both home orchard and commercial growing.

Kelly's Redhaven

A new, desirable, early Peach that has been thoroughly tested and found highly satisfactory. Introduced by the South Haven Experiment Station, it has the fine flavor of the South Haven and Hale-Haven. When other early Peaches are still green, this Peach is a bright red and ready to ship before it is fully ripe. A Peach to plant for real profit. Hardy. Freestone. Self-pollenizing and a prolific yielder. August 20-25.

Kelly Peaches-

*For Taste Thrills
Nothing Compares with a
Ripe, Juicy Peach*

Kelly's Elberta

Leader of all Peaches and the greatest commercial variety on the market; 50% of the Peaches planted are Elberta. A beautiful Peach of good quality; not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. It is large, yellow with red cheek, juicy, high flavor. Flesh yellow; freestone. September 15-20.

Kelly's Golden Jubilee

The Sensational Peach. We recommend this New Jersey Experiment Station introduction. It's a real money maker. Quite hardy, resists excessive cold. Sure cropper, after severe winters and heavy frosts. Golden Jubilee is without equal as an early, large, yellow freestone of highest quality. Flesh is yellow, tender, juicy and sweet. August 20-25.

Kelly's Hale-Haven

A marvelous Peach, a result of crossing the famous J. H. Hale with South Haven. A large, beautifully colored, yellow-fleshed Peach. Ripens approximately 10 days to 2 weeks ahead of Elberta. Perfect freestone; strong grower. Good shipper, and a prolific, heavy bearer. The tree is hardy and fruit is of the highest quality. Should be included in every planting. September 1-5.

Growers interested in quantity lots are asked to please send us their list for special quantity prices.

Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. If properly cared for the trees are sure to bring in a handsome return on your investment. Our trees are of the best quality and sure to be ripe.

Dates after each description indicate approximate ripening season in Western New York. Season varies in different sections of the East, but this will give you an approximate idea when to expect the fruit to be ripe.

BELLE OF GEORGIA. Large, attractive, white-fleshed Peach. Red cheek. Hardy and productive. Freestone. September 3-7.

CHAMPION. Large, creamy white, with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. September 5-8.

J. H. HALE. An extra large Peach, yellow overlaid with crimson. Flesh golden yellow, of delicious flavor. An excellent shipper. A fine commercial variety. Prolific when cross pollenized with some other variety. All of the varieties offered in this catalog are suitable for planting with Hale. Freestone. September 17-21.

SOUTH HAVEN. Another excellent Peach, well worth planting. Golden yellow with red blush. Large, meaty and delicious flavor. Prolific. Freestone. August 25-September 1.

SULLIVAN ELBERTA. Midseason, ripening one week before Elberta. Fruits large. Similar to Elberta in all respects except earlier ripening. One of the most extensively planted varieties in the last few years, especially in the Southeast.

VALIANT. Large, yellow freestone. Juicy, very good quality. Excellent producer and fine canner. Quite hardy in bud. An introduction from Canada. August 28-September 5.

VEDETTE. Ripens a few days before Valiant and 3 weeks before Elberta. Fruit is large, roundish oval, yellow-fleshed, and a freestone. Superior quality and color. August 25-30.

VETERAN. Large, round, yellow-fleshed fruit. Freestone. Since it ripens a few days later than Valiant, it makes a desirable sort to follow that variety. Hardier in bud than most varieties. Ideal for cold sections. August 30-September 4.

NEW PEACH VARIETIES

JERSEYLAND. Very early, ripening about 5 weeks before Elberta. Fruits medium-sized, round. Skin solid red. Flesh yellow, usually free when ripe, firm. Promising for local marketing and commercial production.

FAIRHAVEN. Early midseason, ripening after Golden Jubilee and about 3 weeks before Elberta. Flesh yellow, free. Good for freezing and canning. Promising variety for local marketing and commercial production.

SUNHIGH. (New Jersey Introduction.) Good quality. Yellow flesh. Hardy. Ripens just ahead of Goldeneast.

SUMMERCREST. (New Jersey Introduction.) Yellow freestone. Ripens just before Elberta.

TRIOGEM. (New Jersey Introduction.) Yellow freestone. Ripens 2 to 3 days after Golden Jubilee.

POLLINATION: With the exception of **J. H. Hale**, all varieties we offer are self-fruitful.

NECTARINES

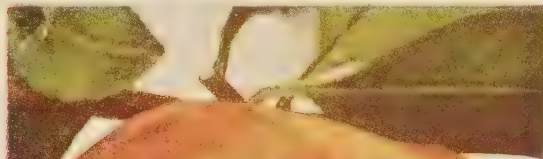

SURE CROP

The tree is vigorous and productive. The fruits are large, roundish, white, and overlaid with very attractive red. The

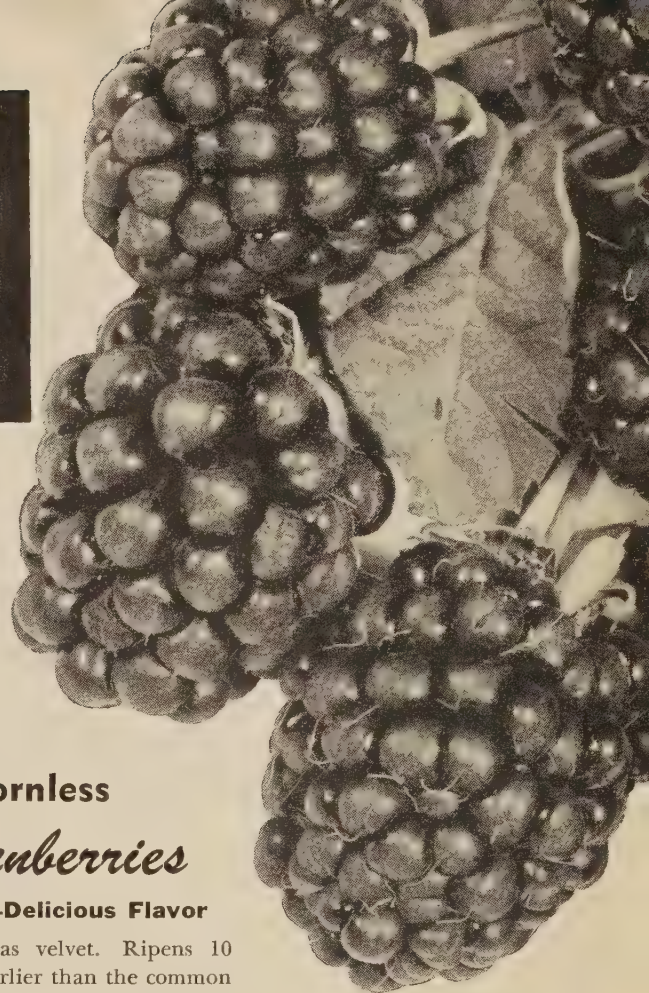

flesh is firm, tender, free from the stone, and very pleasing in flavor.

Each 3 for
2 to 3 ft. \$1.45 \$3.60
3 to 4 ft. 1.70 4.20

GARDEN STATE. (U. S. Plant Patent 92.) A large, firm, yellow-fleshed freestone of high quality, ripening with the Golden-east Peach. It is very desirable for slicing, canning and freezing.

Kelly's Heavy Bearing Bush Berries Make the Best Pies, Desserts and Sauces

Lucretia Dewberries

Of the Blackberry type, but produced on a trailing vine instead of an upright bush. The fruit is earlier, larger, attractive black, firm, and of excellent quality. Plants are disease resistant. **1-yr., No. 1 plants, 6 for \$1.20; 10 for \$1.50; 25 for \$2.75, postpaid.**

Thornless

Boysenberries

Giant Size—Delicious Flavor

Canes smooth as velvet. Ripens 10 days to 2 weeks earlier than the common Boysenberry. The thornless strain retains all the good characteristics of its parent, including its rugged, thrifty growth. You will enjoy picking these large, juicy berries without a chance of scratching your hands.

NUT TREES *that Supply* "Eats" as well as Shade

BUTTERNUT

A fast growing tree that bears within 2 to 3 years after planting. Nuts are large, with sweet, oily, nutritious kernels. Wonderful for nut cookies and cake, and those long winter evenings.

Each

2-3 ft. trees\$1.50
3-4 ft. trees 2.50

English Walnuts

Very Meaty and Thin Shelled

A fine, lofty growing tree, producing large crops of thin shelled, delicious nuts. Makes a desirable shade tree. Not hardy in colder sections except where planted in sheltered location.

3-4 ft. trees, \$2.50 each

AMERICAN BLACK WALNUT

Rich, Flavorful Kernels

Does well in fertile, well drained soil. Very hardy. Grows almost anywhere in the country. Produces annually large crops of nuts with rich, oily kernels of fine flavor. Fine for desserts, nut bread and confections. Tree grows 40 to 60 feet high; is a fast grower and long lived.

Each

Large 3-4 ft. trees\$2.00
Large 4-5 ft. trees 2.50

THOMAS GRAFTED BLACK WALNUT

Grows in all states. Produces larger, better flavored kernels. Thomas is fast growing and produces very large nuts. The tree often bears fruit the second year after planting. A mature tree will produce from 12-36 bu. of giant nuts. Tree grows 25-40 ft. tall and should be planted 40 ft. apart.

4-5 ft. trees, \$2.75 each; 2 for \$5.00; 5 for \$11.25

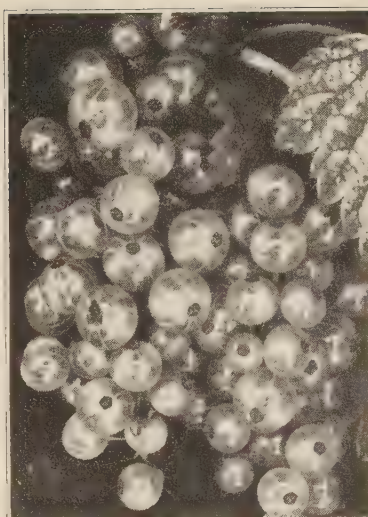

Gooseberries

Strong Grower . . . Delicious Fruit

✓ **DOWNING.** A medium size, whitish green Goose berry of good quality. Strong, upright grower and quite prolific; midseason. July 10 to 15.

✓ **POORMAN.** Largest fruit of any of the American Gooseberries. Attractive red color. Prefers a heavy type of soil. Bush very vigorous. Highest quality of any Gooseberry.

Prices of Gooseberries: Select Bushes
90c each; 2 for \$1.75, postpaid.

Currants

For Delicious Jellies

RED LAKE. The new, giant red Currant. A pleasure to pick. Berries are large, dark red in color, and on long, well filled branches. Very hardy. Ripens over a long season. Long stems make picking easy. **Select, No. 1 plants, 70c each; 3 for \$1.80; 10 for \$5.50; 25 for \$13.25, postpaid.**

WILDER. Unsurpassed commercial sort. Bunches and berries very large, bright, attractive red, of excellent quality. Hang on bushes well. Productive. **Strong, 2-yr. bushes, 70c each; 3 for \$1.80; 10 for \$5.50; 25 for \$13.25, postpaid.**

(We will be glad to quote on larger quantities.)

• **Important:** When ordering Gooseberry or Currant plants, it is necessary to have the following information:

1. County and Township where planting is to be made.
2. Approximate distance from nearest stand of White Pine (Five-Needled Pine.)

If you do not receive the Currants or Gooseberries with your order, you will know we are holding them for the permit. If the permit is not granted, refund will be made.

CULTIVATED Adams Elderberry For Wines and Jellies

The large berries and extra large fruit clusters of this new improved variety are far superior to common varieties. Grows 5 to 6 feet tall. Popular for pies and home-made wines. Beautiful as an ornamental plant.

2-3 ft. Plants, 90c Each; 3 for \$2.50

For commercial planting, write for prices.

Quality Pruning Tools

PORTER DURA SHEAR

One-Hand Pruner

**The Best Pruner
We know of.
Used in Our
Own Nursery.**

This tool has the same extra features as the 8A ANVIL ONE-HAND PRUNER. Cuts in high places or close to the ground. Every Pruner is designed to cut clean and to cut close. The cuts heal quickly and cleanly. Both blades are sharp and have been designed to make close, clean, easy cuts without stripping the bark and without spreading. For the first time, a popular priced shear type tool with quality design features previously found only in the most expensive pruners. Approximate length, 8 1/4 in.; approximate weight, 12 oz.

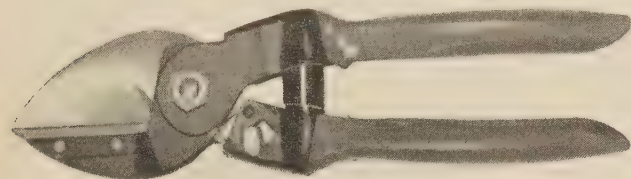

\$3.50 Each, Postpaid

Dura Cut One-Hand ANVIL TYPE PRUNER

This new anvil-type one-hand pruner has been carefully designed and manufactured to cut better and easier and to last longer than other anvil-type pruners. Blade will not distort. The special steel cutting blade is more rigid and practically eliminates spreading of the blades when making parallel or diagonal cuts on large branches. The exclusive plastic covered comfort grips are easy on the hand. No slipping—no blisters. Positive thumb lock is conveniently located—

no more danger of pinching hands while cutting. Approximate length 8 in.; approximate weight 12 oz.

**\$2.75 Each,
Postpaid**

"ALL PURPOSE" HOE

Here's a HOE you can't afford to be without. The handiest little tool we've ever used in our nursery.

Looks funny we know—but it does the work. Order it today—try it for a few days. If you're not pleased with the ALL-PURPOSE HOE, mail it back and we'll gladly send a refund check.

Weights only 1 1/2 lbs.—a child can use it. Seven (7) inches of cutting surface. Hardwood handle only 44 in. long.

Order today—maybe your neighbor would like one also.

\$1.49 Each, Postpaid

GARDEN PRUNING KNIFE

ORDER ONE TODAY

Handy pruning knife of compact design. Light weight—easy to handle. Blade cuts smooth and clean.

1-yr., 4-5 ft.	1.90	1.50	.90	.80

SHIRO PLUM

A Golden Yellow Winner

A very early Plum. Beautiful golden yellow variety. Tree is low growing, hardy, very prolific. The fruit is thin skinned, pleasant to eat, juicy, separates easily from the pit. Excellent for cooking, canning and dessert use. People who like Plums, should be sure to plant this variety. Ripens Aug. 8-15.

ABUNDANCE PLUM

Trees are adaptable to wide range of soils and climates, and bear not only heavily but yearly. Fruit large, very early, amber turning to a rich, bright cherry. Flesh light yellow, very juicy and tender. Freestone. Good for canning. Should be picked when not quite ripe, as it keeps better and taste develops better. August 15-20.

REINE CLAUDE or BAVAY'S GREEN GAGE

This variety is unsurpassed for gratifying the taste, richness of flavor, abundance of juice and pleasant aroma. Has beautiful fruit, large, pale yellow, marked with red if the crop is thinned and sufficiently exposed to the sun. Trees attain only moderate size in the orchard, are productive and bear regularly. Deserves a place in the home orchard. Sept. 25-30.

DAMSON

Fruit is medium size, dark purple, produced in thick clusters. Good to eat out of hand when fully ripe or after a light frost. One of the best of its kind for culinary purposes. Tree a good grower and very productive. September 24-28.

STANLEY

A Better Kelly Prune

The best for commercial planting or home use. Bears fruit in 3 years and ripens 10 days earlier than other varieties. Exceptionally productive. Fruit large, deep bluish purple, firm and sweet; of excellent flavor. Introduced by the New York State Experiment Station, and is becoming a valuable commercial variety. Bears annually. Midseason. Sept. 20-25. Same price as other Prune trees.

BURBANK PLUM

Ripens a week or more later than Abundance. Fruit very large, bright reddish purple. Meaty and quite firm. Should be picked before entirely ripe. Best colored fruit attained when thinned on the trees. Trees are low growing, flat-topped with somewhat drooping branches. Productive and vigorous. Good shipper. Needs close pruning. August 25-30.

PLUM and PRUNE TREES *for Early Crops*

BRADSHAW. A very large and fine early Plum. Attractive, dark violet skin with yellow flesh. Very juicy; excellent for dessert use and for canning. The tree is hardy, and a vigorous grower. Especially desirable because of its ability to produce heavy crops of delicious fruit annually. Bradshaw is recommended for the home orchard as well as for the commercial grower. September 5-10.

FELLEMBERG PRUNE. Also known as **Italian.** Widely known and valuable Plum for dessert, but most esteemed for market and drying for preserving. Fruit is long, oval, purple with a thick bloom. Flesh firm, sweet and pleasant, separating freely from stone. Moderate growth. A great favorite and there is always a good market for them at profitable prices. September 24-26.

FORMOSA is a Japanese Plum recommended for its large, attractive fruits. The Plums are oval to slightly cordate, greenish yellow nearly overlaid with red, flesh firm, juicy, melting, pale yellow, sweet and good, stone slightly clinging, ripens in midseason.

GERMAN PRUNE. One of the oldest Prunes under cultivation and widely known for its culinary purposes, especially for canning. Fruit long, oval, purple with thick bloom; flesh firm, sweet and delicious. Excellent commercial sort. Freestone. September 18-22.

LOMBARD. This variety is well known by all. Medium to large, roundish, dark red. Flesh yellow and juicy. Very attractive. Very good canned, preserved or spiced. Ripens early. Is used in canneries and planted in home orchards where a hardy variety is needed. Trees medium size; very hardy; prolific bearers. September 18-22.

MONARCH. Large fruit with a rich, purple color. Juicy, golden green flesh. A good variety for market. Bears early and abundantly. September 18-22.

SANTA ROSA. A very promising Oriental variety. Fruit is handsome, dark, reddish purple. Large with very juicy, red flesh of good quality. Tree is large, vigorous and moderately productive. August 20-26.

POLLINATION

With the exception of the Prunes, Fellemberg, German, Stanley, etc., which are self-fruitful, Plums should be interplanted to insure a set of fruit—European varieties for pollinating that class and Oriental sorts for those varieties.

Abundance, Burbank, Santa Rosa, and Formosa are Oriental varieties, balance are European varieties.

How to Figure Number of Plants Needed per Acre

To figure the number of plants needed per acre, multiply the spacing together and divide into 43,560, the number of square feet per acre.

Example: Apples planted 35x35. These two distances multiplied together is 1225, which divided into 43,560 equals 35, the number of Apple trees that can be planted to the acre.

ANJOU

This is one of the best late fall and early winter varieties for the market, its season lasting until way into January, even in common storage. Large fruit, green in color, but turning to yellow when ripe, dotted with russet. The yellowish white flesh is firm, but tender, very juicy, sweet, spicy, with a rich, vinous flavor. Trees hardy and vigorous growers, come into bearing early, October to January. (September 25.)

DUCHESS D'ANGOULEME

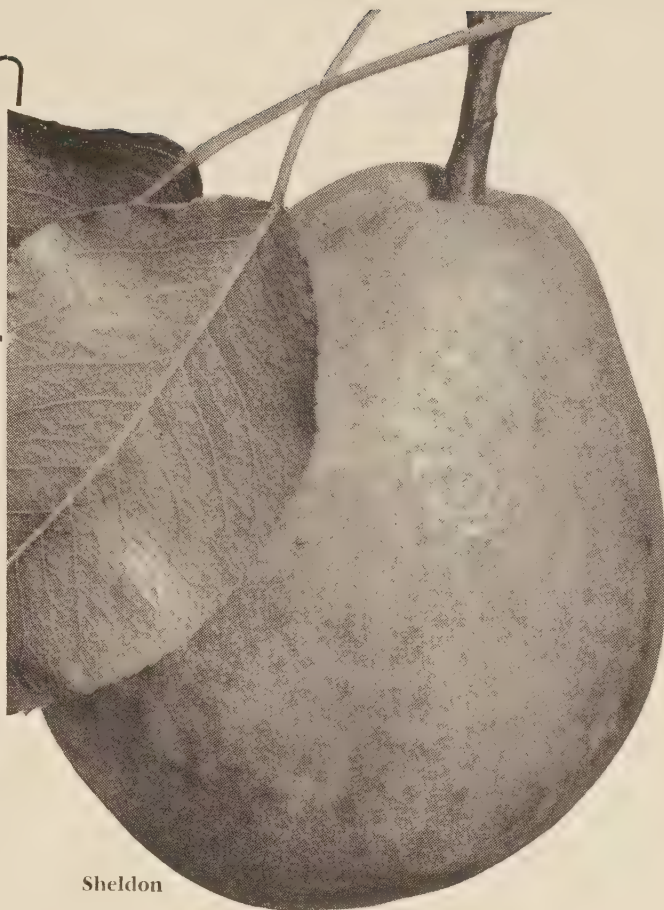

The fruits excite admiration and wonder by their enormous size. Always known by this characteristic. All dull, greenish yellow spotted russet. Trees are vigorous, hardy and healthy. Is a particularly desirable sort for the Pear fancier. November to December. (September 25-30.)

GORHAM

A seedling of Bartlett and closely resembles its parent in all characteristics and ripens from 3 weeks to a month later. It rivals Bartlett in all good qualities, being as large and handsome and as good or better to eat or to can. Fine canner—introduced by the New York State Experiment Station. (September 10-25.)

KIEFFER

Large fruit, rich yellow in color, with red cheek. Very juicy. Good for canning, which brings out its flavor. Trees vigorous, fruitful, and are least susceptible to blight. November to February. (October 1-10.)

Sheldon

A firm variety of Pear that appeals to a large clientele.

SHELDON

The fruits please both the eye and palate. It is distinctive in its russeted skin with a ruddy cheek. Flesh is juicy and deserves to be called luscious. Flavor is sweet, vinous and highly perfumed. Keeps well and ships well. Trees are vigorous and hardy. October. (September 20.)

TYSON

The Home Orchardist's First Choice

The quality of this old favorite is far superior to that of commonly grown Pears. The tree is a thrifty grower and very hardy—fruit is medium size, juicy with a spicy, scented sweetness that gives the fruit the charm of individuality. (Ripens late in August.)

*Kelly's
Famous*

BARTLETT

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as it is grown in, and is adaptable to all different climates, soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear — a leader among canning Pears. (Sept.-Oct. (Sept. 1st-10th.)

Pollination

Two varieties are needed. The only combination that is cross-incompatible is Seckel and Bartlett. A third variety is needed with the above two.

CLAPP'S FAVORITE

Precedes Bartlett, which it resembles in size, shape, color and flavor. It is the first Pear on the market. Large, pale lemon-yellow fruit with brown dots. Fine texture, juicy, buttery, with a rich, sweet, delicate vinous flavor. Tree hardy and productive. Thrives where other varieties fail. August 15-20.

BOSC - Quality Pear

A Pear which is rated by all as "very good" or "best." Has a long, tapering neck and a long stem which allows it to sway in heavy winds without dropping. Brownish yellow in color. Flesh is tender, buttery, very juicy, with a rich flavor and pleasing aroma. The tree is a slow grower, but most productive. Oct. to Jan. (Sept. 25-30.)

SECKEL

The Pear to plant for eating fresh and pickling. Medium size, skin rich yellowish brown with deep, brownish red cheek when fully ripe. Flesh very fine grained, juicy, sweet and good. Trees resistant to blight, very productive and hardy. Should be planted in fertile soils, not heavy clay. September and October. (September 20-25.)

MONTMORENCY

America's Famous "SOUR" Cherry

Always in demand by the home canner as well as the canning factories where they are canned by hundreds of tons. The trees are good bearers and the fruit ships well and appeals to the human eye for color as it is a bright clear red. Is good sized and has a fine flavor. Can be eaten right off the tree and makes excellent pies and other desserts. A variety that is hard to beat from any angle. Ripens about July 15.

BLACK TARTARIAN Sweet

Well known and popular sweet Cherry; very large, bright purplish black, juicy, and has a rich flavor. Excellent for canning and a good shipper. Trees are remarkably vigorous and erect growers, produce immense crops. Ripening date June 20-July 4.

PRICES SWEET VARIETIES

	1-9 Each Postpaid	10-49 Each	50 or More Each

SCHMIDT'S BIGARREAU – Sweet

A midseason black sweet Cherry. Considered one of the best large varieties of its season. Delicious to eat fresh and canned, and very attractive. Fruit grows in clusters. Keeps well and is an excellent shipper. In size it is usually unsurpassed by any black Cherry in the East. Ripens around July 10.

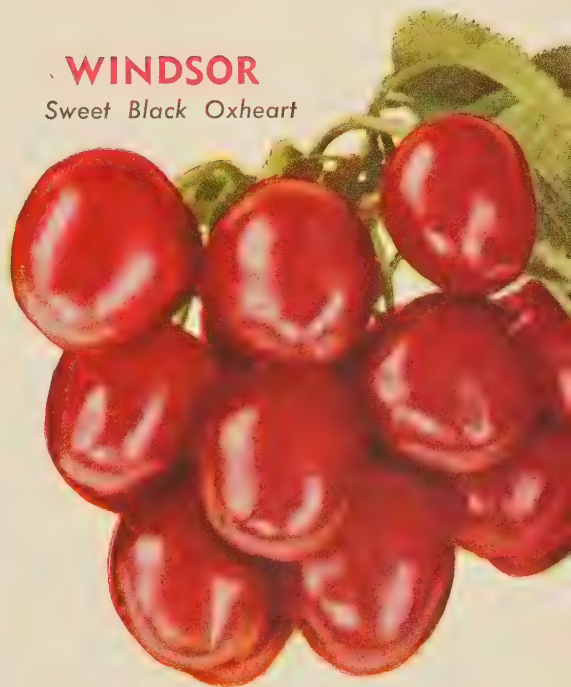

NAPOLEON CHERRY

Sweet White Oxheart

This is a choice sweet, yellow Cherry of the highest quality, known as the White Oxheart. Good for market and canning. Pale yellow, with attractive bright red cheek; flesh firm, flavor rich and sweet. Fruit keeps well so fruit dealers like it for the market. Trees productive and come into bearing early. Ripening date July 7-10.

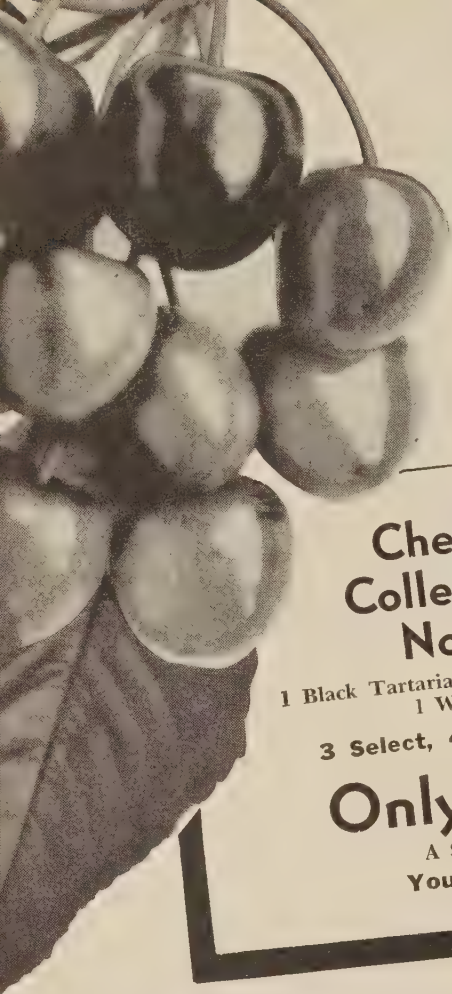

WINDSOR

Sweet Black Oxheart

One of the best quality dark Cherries, often referred to as Black Oxheart. Has pinkish flesh and almost black skin. Large, juicy and firm. Delicious to eat, fresh and wonderful for canning. Used extensively for fancy preserving. Tree grows upright and is a rapid and vigorous grower. A good commercial variety. Ripening date July 20-26.

Cherries continued on page 22.

EARLY RICHMOND

Fruit small but good and the earliest of the sour. Unsurpassed for cooking purposes. This is the variety that yields such marvelous crops in the home gardens. **Most hardy of all varieties.** Uninjured by the coldest winters. Tree slender in growth, with a roundish, spreading habit. Ripens June 25-30.

ENGLISH MORELLO

Fruit is handsome in appearance, real tart. Is recognized as the standard late sour Cherry, taking the place of Montmorency after its season is over. Cooking gives the fruit a rich, dark wine color, very attractive in appearance and a pleasant, aromatic flavor. Tree is small, upright spreading with drooping branches. Ripens July 20-30.

Many people often ask which varieties we would suggest for planting. We highly recommend Windsor, Emperor Francis, Napoleon, and Schmidt's Bigarreau. Each one pollinates the other—any combination of two or more gives desired results.

BLACK GIANT

Was introduced by Luther Burbank in 1914. Tree is large, vigorous, very productive. Cherries are attractive in size and color; the crop is late, coming in season just before Lambert, which the black fruits resemble. Quality is excellent and less subject to cracking than Bing. One of Burbank's most notable productions.

EMPEROR FRANCIS

The Queen of All Sweet Cherries

Recognized as one of the newer leading sweet Cherries for home and commercial orchards. This high quality Cherry resembles Napoleon in size and color except that it becomes a little darker. Ripens around July 4th. Sold at same prices as regular varieties.

Pollination

Sweet Cherries are self-unfruitful, so must be interplanted. Where Napoleon, Bing and Lambert are to be planted together, another variety, such as Windsor or Black Tartarian must be added, as the first three will not pollinate each other. The Sour varieties are self-fruitful.

See page 21 for Cherries in color.

MAZZARD ROOT TREES

If you wish trees on Mazzard roots, we can supply Montmorency and English Morello Sour Cherry, Napoleon, Windsor, Schmidt's Bigarreau and Emperor Francis Sweet Cherry at **10c** a tree over the prices listed on this page.

2 NOVELTIES

KELLY'S BEACH PLUM

(*Prunus maritima*)

Ideal as a shrub—also produces delicious fruits. Bears first or second year after planting. Grows 6 to 8 feet at maturity. Hardy; does well in poor soil. Beautiful white blooms late in the spring before the leaves appear. Purple fruit, ripe in September, makes excellent jelly. **Selected plants, \$1.95 each, postpaid.**

HANSEN IMPROVED BUSH CHERRY

An ornamental shrub, producing fruit. Very easy to grow, highly productive and hardy. The fruit is large and black. Leaves silvery green, turning red in autumn. Attractive white blossoms add to landscape effect. Dwarf growing, 4 to 5 feet tall. Can be kept trimmed. Best to plant two or more bushes for better fruit production. **3-year-old, bearing size, 2 for \$1.45, postpaid.**

RHUBARB—Choice

MacDONALD. New Red Rhubarb. Introduced by MacDonald College, Quebec, Canada. Considered the finest of all Rhubarb. A heavy producer. Giant size stalks, 18 to 24 inches long, 2 to 3 times larger than the common Rhubarb. Sweeter and more tender. Use it all spring and most of the summer. Its red skin and white flesh make the finest looking and best tasting Rhubarb sauce and pie you ever ate. Practically seedless, grown only from divisions. 75c each; 3 for 2.00; 10 for \$6.00, postpaid.

CANADA RED. The reddest of all Rhubarbs and a runner-up in taste appeal to Valetine. Has large, tender, juicy stalks that are rich red all the way to the heart and even to the mid-ribs in the leaves. Skin so tender you need not peel it. **Canada Red**, a heavy producer, can be used throughout the season. Plant now and have Rhubarb this year. **Prices: \$1.00 each; 2 for \$1.85; 6 for \$4.85, postpaid.**

Fruits on This Branch are Actual Size

HANSEN Bush Cherries

A Kelly Recommendation

An ornamental shrub, producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and wonderful to eat right from the bush. Leaves are silvery green, turning red in autumn. Attractive

white blossoms add to landscape effect. Dwarf growing, 4 to 5 feet tall. Can be kept trimmed. Best to plant two or more bushes for pollination. **2 for \$1.45, postpaid.**

NEW

Chinese Chestnut

HARDY, BLIGHT RESISTANT

These new blight resistant trees will bear nuts two years after planting. They are a fast growing tree and an ideal plant to take the place of the old-fashioned American Chestnut that we all remember from our childhood days. The fruit is fully as delicious as the native American Chestnut and slightly larger in size. Grows to 35 ft. tall. Best crops are insured by planting two or more trees for pollination.

Good-rite No-Nib'l

(NO-NIBBLE)

RABBIT REPELLENT

A chemical dust mixture which comes in a handy six-ounce container and may be applied directly from the container or used in a spray at the rate of four teaspoons to a pint of water. Is non-injurious to plants, birds, rabbits and other animals. A very effective taste repellent that will protect your vegetables and garden from these rodents.

6 oz. can, \$1.25, POSTPAID.

STOPS DEER-DAMAGE!

Good-rite Z.I.P. Deer Repellent

protects trees, shrubs, crops

Non-injurious to plants and browsing animals. Once deer nibble Z.I.P. sprayed growth, they find the spray so unpalatable they stop. Simply mix with water and apply as a spray. Resists washing off by snow and water. Two years of extensive research was made before this product was put on the market. A test was made on spraying every other row of dry beans. The deer would skip the sprayed row and eat just the rows that were not sprayed.

1 Gal. can, \$7.50 POSTPAID.
5 Gal. Drum, \$35.00 FREIGHT PAID.

Kelly's

Heavy-Rooted Hardy

GRAPES

THEY RIPEN QUICKLY

Kelly's Grape Vines last a lifetime. Plant our selected plants. Guaranteed to be the finest plants grown. Easy to grow, adapted for a wide range of soil and climate. Prolific bearers. Fruit ideal for dessert, jelly, jam or juice. Full planting instructions with each order.

GOLDEN MUSCAT

California Type Grape

Wonderful new golden yellow Grape. For home use and roadside market it is one of the best. Possesses rich golden color and fine Muscat aroma of European Muscat. Vine is vigorous, productive. The clusters are very large and compact. Berries are large, juicy, sweet and tender. October 5-10.

Selected, 2-Year Vines: \$1.00 each; 3 for \$2.75, postpaid.

FREDONIA

A Fine Sweet Grape

The leading early black Grape. An introduction of the New York State Experiment Station. Plant is a strong, healthy grower. Clusters medium in size. Berries large and juicy. September 5-10.

SENECA

You will be amazed at the taste of this delicious California Vinifera Grape. Tender skin which can be eaten with the berry makes Seneca a desirable dessert Grape. Vine is vigorous, hardy and productive. Berries sweet and juicy. Ripens first week in September.

Select, 2-Year Plants:

**\$1.00 each;

THE OLD FAVORITES

DELAWARE (Red)

Bunches and berries small. Light red. Unusually sweet and delicious. One of the best red varieties. September 20.

NIAGARA (White)

The most popular white Grape. Bunches and berries extra large. Vigorous, productive and a good keeper. September 25-30.

PORTLAND (White)

Holds first place among Grapes as an early white variety. Vine is hardy, healthy and productive. Bunch and berries largest of all white Grapes. September 1-8.

NEW EXTRA CHOICE GRAPES

BRONX SEEDLESS (Red)

This new red Grape is the best seedless variety available today. Clusters are large, very long, attractive. Berries large, entirely seedless, firm, crisp. May be eaten with skin as California Grapes. Excellent in quality. Vine vigorous, productive. Ripens September 20.

Selected Vines: 2-yr., \$1.25 each; 3 for \$3.25, postpaid.

BUFFALO

New, early black Grape, ripening first week in September. Desirable for dessert and wine. Vine is a vigorous grower and very prolific. You'll like these sweet, juicy Grapes. Medium to large in size. Order a vine today. Supply limited. **Selected Vines: \$1.00 each; 3 for \$2.75, postpaid.**

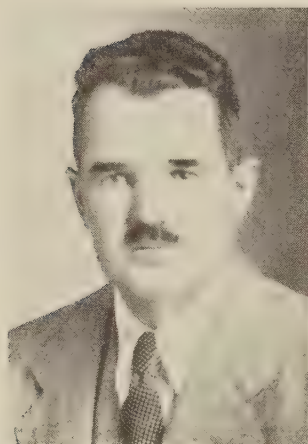

VAN BUREN (Black)

Best new, early Grape. Desirable for home and commercial planting. Resembles Concord, but much sweeter and very juicy. Aug. 28-Sept. 2. We highly recommend this variety. Vine is heavy producer and vigorous in growth. **Selected, 2-yr. vines: \$1.00 each; 3 for \$2.85, postpaid.**

HELPFUL HINTS ON SMALL FRUIT GROWING Prof. George L. Slate

New York State Experiment Station, Geneva, N. Y.

Prof. George L. Slate

RASPBERRIES and BLACKBERRIES

(See pages 32 and 33)

Raspberries and Blackberries are easily grown fruits if their cultural requirements are met. An open, airy situation is best and the plants should be away from the root competition and shade of tall trees, but may be grown among the smaller fruit trees in the home garden.

Most good farm and garden soils are suitable if not very heavy or very light, and are well drained so that water does not stand on or near the surface more than a few hours during the growing season. Keep black and purple Raspberries off the ground that has grown Tomatoes, Peppers, Eggplants or Potatoes the past two or three years. Get rid of old run-out Raspberries nearby to prevent disease spreading into the new planting.

Preparing the Soil

Fit the land thoroughly as for vegetables—plowing under a green crop or stable manure if the soil has been under constant cultivation. Red Raspberries and Blackberries may be planted in late fall or early spring, but fall planted plants should be mounded up to prevent them from heaving out during the winter. Tip plants of black and purple Raspberries should be planted in the spring. Space Raspberries in home garden 7 feet between rows and 2 feet between red Raspberries in the row, and 3 feet between black and purple varieties in the row. Set the plants the same depth they grew previously and be sure the soil is packed tightly so that the plant will resist a strong tug without loosening.

Cultivation

Weeds must be kept down by cultivation or mulching. Cultivation should be shallow and frequent enough to keep down weeds. Mulching is especially valuable in dry seasons. Straw, spoiled hay, weeds, lawn clippings, peat and sawdust are all suitable. When sawdust is used an extra feeding with a nitrogenous fertilizer is advisable. Cultivation should be discontinued after the crop is off or about August first and the weeds allowed to grow or buckwheat may be sown between the rows to check cane growth and harden the plants off for winter.

Fertilization

For fertilizers after the first year any of the following materials may be applied in early spring:

Nitrate of Soda, $\frac{3}{4}$ lb. per 100 sq. ft.
Ammonium Nitrate, $\frac{3}{8}$ lb. per 100 sq. ft.
Stable Manure, 3 bus. per 100 sq. ft.
Poultry Manure, 1 bu. per 100 sq. ft.

On soils low in fertility, especially sands or gravels, or eroded soils, supplement the nitrates with a 10-10-10 fertilizer at the rate of 1 lb. to 100 sq. ft. If new growth is too rank and winter kills, reduce or discontinue the manure until lessened growth indicates its need.

Red Raspberries and Blackberries produce many suckers which must be kept within bounds. When cultivating or hoeing, restrict the row to one foot in width by removing all suckers coming up between the rows.

Raspberries and Blackberries must be pruned each year. The canes are biennial; they grow one season, bear fruit the second season and then die. After the crop is harvested the canes which bore it are cut out, leaving behind the current season canes to fruit the following year. In the spring the red Raspberry canes are cut back to a height of 4 to 5 feet, depending on the variety, and the weaker canes removed, leaving the canes spaced about 6 inches apart in a row a foot wide. Black and purple Raspberries are treated in a different manner. In June when the new shoots of black Raspberries are 18 to 24 inches high they are pinched off to induce branching. Purple Raspberries are pinched 6 inches higher. Blackberries are pinched at 3 feet. Do this as soon as the required height is reached in early June. The following spring cut the branches back to 8 to 10 inches for the black Raspberries, 10 to 15 inches for the purple Raspberries, and 15 to 18 inches for the Blackberries.

Fall bearing red Raspberries, such as Indian Summer, are pruned the same as other red Raspberries.

Blackberries that bloom, but produce no fruit or only poorly developed berries, should be sprayed just before the bloom with DDT at the rate of one pound of actual DDT to 100 gallons of water.

STRAWBERRIES

(See pages 34 and 35)

Strawberries are one of the best home garden fruits, being valuable for dessert, freezing and jam, and unusually high in Vitamin C, outranking even the citrus fruits in that respect.

Location of Bed

The site should be sunny, away from the shade and roots of large trees, although interplanting among young fruit trees is satisfactory. The soil should be fertile, well drained and free from quack grass and other perennial weeds. Soils that will grow good vegetables are suitable for Strawberries, but the berries should not be planted where Tomatoes, Peppers, Eggplants or Potatoes have been grown for several years, as these may infect the soil with a wilt disease that is destructive to Strawberries. Keep the Strawberries a few feet away from the place where these vegetables have been grown. Grass sods may have white grubs and should be avoided until they have been cultivated two years. Manure or ploughing under a legume sod is good preparation.

Planting Time

Early spring, not August, is the time to set Strawberries. Space the plants 18 to 24 inches apart in rows $3\frac{1}{2}$ feet apart. The crown or solid center of the plant should be set even with the surface of the ground and the soil firmed so tightly against the roots by pressure of the foot that the plant will resist a strong tug without loosening. After the runners form, space them around the mother plants so that they are about 6 inches from each other and the row is 18 inches wide. Remove as weeds runners coming after the row is filled out. The first runners are the most productive.

Fertilizing

Manure at the rate of 3 to 6 bushels to 100 square feet at the time the ground is fitted will provide adequate fertility. Lacking manure, a 10-10-10 fertilizer may be worked in before planting, or applied as a side dressing at the first hoeing. A pound to 100 square feet is about right.

A nitrogenous fertilizer such as nitrate of soda, $\frac{1}{2}$ pound to 100 square feet, or ammonium nitrate at half that rate may be broadcast over the plants in late August when the foliage is dry, and immediately brushed off with a broom or piece of brush. Fertilizer should not be applied to the bed in the spring of the fruiting year.

Keep weeds out of the bed at all times, and the soil mellow to facilitate the rooting of runners.

Winter Protection

In the fall, usually about mid-November and before temperatures get below 18-20° F. above zero, the plants should be mulched with straw to a depth of about 3 inches. In the spring, early April, just as the new leaves are starting from the crown, remove part of the straw to the space between the rows, leaving a thin covering over the plants for the leaves and blossoms to grow through and the fruit to rest on later.

Weed the bed about blossoming time if necessary. Do not fertilize the bed in the spring of the bearing year unless the soil is very poor, or the bed has not been mulched.

If the rainfall is less than one inch a week, irrigation may increase the crop. Apply enough water to equal an inch of rain per week. Over-watering may cause rotting of the berries.

GRAPES

(See pages 28 and 29)

Grapes should be grown in an open, airy situation to lessen injury from fungous diseases. Slopes are preferable as frosts are later than in low spots. Late varieties ripen better on the south side of a building or solid fence. The soil must be well drained.

Planting

Either one- or two-year plants are suitable and may be set either in the fall or spring, but fall-set plants should be mounded up the first winter. Space vines 8 feet apart. Vines may be trained to arbors, porches or a trellis of two wires, one 2½ feet above the ground, the upper 2 feet above the lower. Posts about 25 feet apart with end posts braced.

Training

With Kniffin system of training the vine has a trunk to top wire and an arm in each direction on both wires. Newly set vines are cut back to one or two buds. New shoot is staked up to form a trunk and when it reaches top wire is pinched off and laterals led out, one along each top wire. The next year two laterals are led along the lower wires, the other being rubbed off. Thereafter, at the annual pruning in the spring leave a strong lateral along each wire and remove other canes. Laterals should have 6 to 10 buds each. Leave more buds on vigorous vines, fewer on weak vines. If vigorous vines bloom well but set light crops, leave more buds next year. If vines overload and fruit fails to ripen well leave fewer buds next year. Grapes should not be summer pruned.

Fertilize with ammonium nitrate or nitrate of soda at rate of one-fourth to one-half pound per vine or stable manure. Strong growing vines do not need fertilizing. Keep down weeds until August with cultivation or mulch.

RHUBARB

(See page 25)

Rhubarb is highly prized for sauce and pies in the spring before other fruits and vegetables are ready. Rich soils are essential and a heavy application of manure should be made in advance of planting. An annual application of manure, or commercial fertilizer, is desirable. Use the manure at the rate of 3 to 6 bushels to 100 square feet, or 10-10-10 fertilizer plus 1 pound of nitrate of soda, or one-half pound of ammonium nitrate for the same area. Plant the roots in early spring 3 to 4 inches deep and 3 feet apart in the row, and at one side of the garden as they last for many years. Clean cultivate or mulch, as vigorous growth means high yields and tender stalks. Pull only a few stalks the second year, but thereafter a full crop may be harvested for about two months each spring.

Early Rhubarb may be had by covering a hill with a sash over a box just before growth starts. Rhubarb may be forced in a box of soil in the cellar during the winter if the roots are brought in after experiencing a hard freeze.

CURRANTS and GOOSEBERRIES

(See page 15)

Currants and Gooseberries are both valuable home garden fruits that should be grown much more than at present. Both yield heavy crops annually and have many uses in the kitchen. They will grow in the sun or in the shade of the north side of a building or fence and may be successfully interplanted between young fruit trees or grape vines.

Well drained fertile soils, preferably rather heavy in texture, are best, but the lighter types will do if heavily fertilized and mulched in time of drought. They may be planted in late fall or early spring, and spaced 5 feet apart in the row. At planting time cut the canes back to 6 or 8 inches. Cultivate shallowly, or mulch to keep down weeds.

Straw manure may be applied to a depth of 2 or 3 inches to provide fertility and act as a mulch. If manure is not available, apply about 4 ounces of nitrate of soda or 2 ounces of ammonium nitrate per plant in early spring, but not applying any the year the plants are set. On light soils a complete fertilizer may be needed in addition to the above, in which case use one-half pound of 5-10-5 formula to each plant.

Currants and Gooseberries in good vigor produce so many canes that the bushes soon become too crowded. Pruning consists of removing all canes over three years old and thinning out the weaker remaining canes so that the pruned bush consists of 9 to 10 canes evenly divided between 1, 2 and 3 year-old wood.

Currants for jelly should be picked before fully ripe as there is more pectin at that time. Gooseberries make an excellent jam and jelly and may be used green for pies and sauce when two-thirds grown.

ASPARAGUS

Asparagus is an easily grown perennial that is ready to use in early spring. The beds last 15 to 20 years and should be set at one side of the garden. Set one-year-old roots 18 inches apart in a trench 4 to 6 inches deep and 4 feet apart if more than one row. Cover the roots at first with only two inches of soil, filling in gradually when cultivating. Begin cutting the third season and cut for one month. In the following years the bed may be cut for two months. Fertilize with a complete fertilizer and control weeds. If beetles feed on foliage dust with rotenone.

BLUEBERRIES

Blueberries are a valuable home garden and commercial fruit and deserve a place in every home garden with soils that are acid, or can be made acid. Clay soils are not suitable for Blueberries.

Acid Soil Required

Acid soils are essential for Blueberries. If in doubt, have the soil tested by the Farm Bureau, and if the pH is under 5.5, Blueberries may be planted. If over 5.0, spade in aluminum sulphate as follows to each 100 sq. ft. Aluminum sulphate listed on page 27.

If present pH on your soil is	To change to pH of 4.5 use:	
	On sandy soils	On loam soils
5.0	2.4 lbs.	7.2 lbs.
5.5	4.8 lbs.	8.3 lbs.
6.0	7.2 lbs.	21.0 lbs.
6.5	9.0 lbs.	27.6 lbs.
7.0	11.4 lbs.	34.8 lbs.

Location

Blueberries grow much better and on drier sites when mulched than when cultivated. Sawdust of any kind and age is ideal mulching material, but pea and other materials except legumes, will do. Twice as much nitrogen is necessary during the first few years of a sawdust mulch.

Fertilization

Sulphate of ammonia is the best material for fertilizing Blueberries. Beginning with the second spring after planting, apply it at the rate of 2 ounces per plant, doubling this if a sawdust mulch is used. Scatter the fertilizer over the surface of the ground from one-half to three feet from the center of the bush. Increase the application two ounces each year until mature plants five or six years old are receiving three-quarters of a pound per year.

Pruning

Pruning is necessary after the third year to prevent overbearing and to maintain berry size. Remove low-spreading branches near the ground, at least one old cane each year, and remove the weaker new canes, leaving two or three of the stronger to gradually renew the bushes.

A few bushes near buildings may need a cheesecloth cover to prevent birds from taking the berries.

Flavorful Raspberries AT THEIR BEST

will Bear Bumper Crops*

Read about the New
Everbearing Raspberry

"SEPTEMBER" on back cover

A Great LATHAM- Commercial Berry

10 CHOICE PLANTS, \$2.75

The leading Red Raspberry in all parts of the country. Latham is free from insects and diseases and multiplies rapidly. Berries are large, plump, juicy, free from seediness and full of delicious flavor. Very hardy; cold weather seems to have no effect on its bearing ability. Ripens July 1-10.

**10 for \$2.75; 25 for \$4.95; 50 for \$8.50; 100 for \$14.95; 250 for \$30.95, postpaid.
500 for \$48.85; 1000 for \$85.00, not postpaid.**

The New MILTON

A late variety for market and home use. The berries are large, long conic, resembling those of the Taylor in size and shape. They are attractive, bright red, firm, not crumbling, mild sub-acid and good. It ripens 2 or 3 days later than Taylor and Latham. The plants are vigorous, productive and hardy. Milton has remained free from mosaic, in a test planting, in the Hudson Valley, where numerous other varieties soon become infected. This freedom from mosaic is an important reason why the seedling was named and introduced for more extensive testing by growers.

Cranford, N. J.
July 17, 1950.

Dear Sirs:

We are just finishing picking a large crop of wonderful fruit. Your Indian Summer Raspberry surpasses anything I have ever known, for size and flavor, and where I have made gifts of the berries, the comment is always the same "we have never tasted such delicious Raspberries." On my shelves are thirty pounds of perfect jam—equal pounds of fruit and sugar and cooked to the exact degree of perfection.

Cordially yours,
Mrs. Maude L. Baillard

SODUS (Purple)

The leading purple Raspberry. Recently introduced by the New York State Experiment Station. Berries are very large, firm, sprightly and good in quality. The plants are very vigorous, very productive, and hardy. More resistant to drought than the old Columbian and yields good crop every year; it ripens shortly after Latham. July 10-12.

BLACKBERRIES - HEDRICK

Here's a new Blackberry. Just introduced by Dr. Geo. L. Slate at the New York Experiment Station. Bound to become the country's leading Blackberry. For years the bearing habits of the standard Eldorado variety have been irregular. Plants would make excessive growth, but would be shy in the bearing of fruit. For that reason, intensive breeding work has been going on at the New York State Experiment Station to improve Blackberries. This new variety, Hedrick—named after Dr. U. P. Hedrick—former Director of the New York State Experiment Station, shows great improvement over varieties that have thus far been on the market. The berries are somewhat larger than Eldorado and are moderately firm, without core and of good quality. Ripens in Western New York during the latter part of July. If you have never had much success growing Blackberries, we would suggest that you try this new variety. For home use and commercial production, there is a need for good Blackberries. 1-Year No. 1 Plants: 6 for \$1.95; 12 for \$3.75; 25 for \$7.25; 50 for \$13.50; 100 for \$21.50; 250 for \$46.50, postpaid. 500 for \$87.50, not postpaid.

Sparkle

(Midseason-Late)

This variety originated at the New Jersey Station. It is claimed the best late variety that has been tested at the Geneva, N. Y., Experiment Station. This highest quality Strawberry ripens a week later than Premier. Recommended for freezing. The plants are vigorous and produce runners freely. Sparkle produces an excellent crop. Recommended for the New England States.

Everbearing GEM

The most popular and profitable everbearing variety. The bright red berries are large, good quality, ripen evenly without having green tips. Will bear some fruit this summer and a good crop in the fall. Plants hardy and vigorous growers.

Kelly's Famous White Flowering CRAB TREE

This is undoubtedly the most beautiful Flowering Crab that can be grown in the North successfully. It is an upright tree, entirely covered with beautiful white flowers which last a long time, followed by red-skinned fruit with white flesh throughout, and lingers until fall. The fruit is excellent for canning or jellies. Tree is very hardy and disease free. Outstanding sensation for single or group planting. **Price: 3-4 ft., \$2.00 each, postpaid.**

TREE WISTERIA

No more lovely sight can be imagined than a Tree Wisteria in bloom. The purplish blue flowers completely cover the tree during May, transforming it into a sheer beauty. On the lawn they develop into beautiful specimens, increasing in beauty and dignity each successive season. Can be kept trimmed to a height of 6 to 8 feet.

Grafted, Sure-to-Bloom, Balled in Peat, 3 to 4-ft. trees, \$4.95 each, not postpaid.

GOLDEN CHAIN TREE

No picture can do justice to this rare, low growing tree. Its long clusters of pure golden yellow are similar in form to the well known Wisteria, and often reach 18 inches in length, as many as 6 or 8 clusters on a small twig. Does well in either partial shade or full sun. A show plant all season with its decorative green bark and large, clover-like leaves. **4-5 ft. trees, \$4.00 each, not postpaid.**

EUROPEAN MOUNTAIN ASH

Much more satisfactory than the native species, since it fruits more prolifically and has more compact habit. Large flat clusters of white flowers in the spring. Clusters of flashy, orange-red berries all over the tree in summer and fall. Deep green, clean foliage perfectly implements the graceful, upright habit. Grows to a height of 18 to 25 ft. with a spread of 15 ft. maximum. **5-6 ft. trees, \$4.00 each, not postpaid.**

CRIMSON KING MAPLE

(Plant Patent No. 735)

You will want to be one of the first to own this new tree. It is a beautiful form of Schwedler Maple, originating in Europe. Like the Schwedler it develops a rounded, compact top of unusual symmetry, but differs in having foliage of deep, purple-crimson all through the growing months. Crimson King has been under close observation in this country for 10 years, and in every instance has kept its rich coloring throughout the season. It has been said: "Crimson King is beautiful beyond words." Grows 25-40 ft. tall. **4-5 ft., \$6.50, not postpaid.**

Enjoy the Grace and Color of Beautiful Trees

RED JAPANESE MAPLE

Grows no taller than 8 to 10 feet. Leaves a startling crimson all summer. Makes an excellent specimen for side yard or in formal garden. Has best color when in full sun, but will tolerate moderate shade. Trees moss balled. **1 to 1 1/2 ft., \$5.75, postpaid.**

ROSE TREE of CHINA (Prunus Triloba)

Branches are hidden under a fleecy cloud of bright pink double blossoms resembling small pink Roses, even before leaves are out in the spring. A breath-taking sight in full bloom, especially when it reaches full height of about 6 feet. Should be included in every yard. Very hardy and easy to grow. **Price: 2-3 ft., \$2.00; each; 3 for \$5.75. 18-24 in., \$1.65 each; 3 for \$4.65, prepaid. 3-4 ft., \$2.50 each; 3 for \$7.00.**

RED-FLOWERING CRAB (Malus Floribunda)

This small tree is round-topped with single, carmine buds that change to pink and then white. Very heavy bloomer with small blood-red fruits, which can be used for jells. Will stand severe winters and drought. 15 to 20 feet at maturity.

4-6 ft. trees, \$2.50 each, postpaid.

CHINESE ELM

A very rapid grower, growing to a height of 30 to 40 ft. with small dense foliage. Excellent for tall hedge or windbreak. Makes remarkable shade in five short years. A wide spreading tree with slender limbs and drooping twigs. **6-8 ft. trees, \$3.25 each; 8-10 ft. trees, \$4.25 each, express not prepaid.**

WISCONSIN WEEPING WILLOW

There are few trees that can be used to such advantage for cheery winter effects. Grows fast, adapted to a variety of soils and uses. Is very hardy, and beautifully effective near pools, along drives and on lawns. Grows 25 to 30 feet tall.

Shade Trees... For Lawn and

Sugar Maple

(Hard Maple). This is the tree that has such beautiful scarlet, orange and yellow foliage in the fall. It is native to many sections and is the source of the delectable Maple Sugar. Develops into one of the grandest of all trees. **6 to 8 ft., \$4.50 each. Express not prepaid.**

Silver Maple

Most rapid grower of all Maples. A large, spreading tree which, at maturity, has a height from 60 to 70 feet. A cut leaf with a silvery cast, and also a silvery bark. Sap is good for sugar making. **5-6 ft., \$2.75 each; 6-8 ft., \$3.25 each; 8-10 ft., each \$4.25. Express not prepaid.**

Ginkgo

Has great vigor, growing from 60 to 70 feet high. In form, it varies from tightly pyramidal to wide spread irregularity. It is always fresh and green and in autumn, a cloud of gold. The leaves of this tree are fan-shaped and the branches are nearly parallel. Does well in any soil. A very picturesque tree. **5 to 6 ft., \$4.50 each. Express not prepaid.**

TULIP TREE

Lovely native tree. Tall growing, with stately habit. Large irregular leaves make it ideal for quick shade. Has numerous Tulip-like flowers in the spring, as tree matures. Blooms are yellow marked with orange. **5-6 ft., \$2.50 each; 6 to 8 ft., \$3.00 each. Express not prepaid.**

SCHWEDLER MAPLE

This is a beautiful tree in all seasons. In the spring, the foliage is a reddish purple, followed by a bronzy green color in the summer. It is very attractive in the fall when its foliage is a golden yellow. It is recommended for specimen planting in lawns. Symmetrical in growth. Not a fast growing tree. **6-8 ft., \$5.50 each; 8-10 ft., \$6.50 each. Express not prepaid.**

Stately PIN OAK

For an artistic, attractive shade tree, it is one of the fastest growing of the Oak family. The foliage is rich green, deeply cut, glossy copper in late fall. Generally disease and insect free. At maturity stands 30 to 40 ft. Grows in a symmetrical pyramidal form. **6 to 8 ft. trees, \$6.00 each. Express not prepaid.**

Street Planting

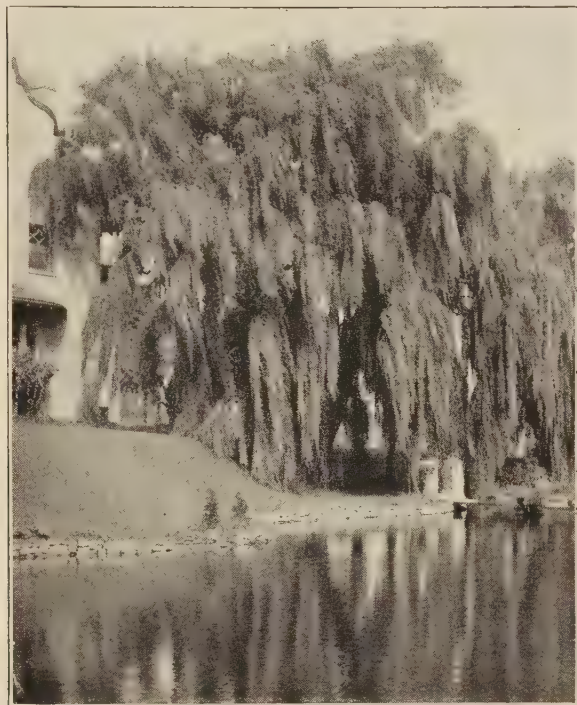

Norway Maple

The Best All Around Shade Tree

Recognized as the finest shade tree for generations. Strongly resistant to storm, very clean in habit, the leaves will withstand smoke, soot and attacks from insects. Rich indeed is the city whose inhabitants plant Norway Maple as a permanent street tree. Its dense leaves are a rich green in color, and hold on the tree longer in the fall than most Maples, without much change in color. A good tree for street or lawn specimen plantings where good form and shade are needed. Reaches a height of 30-50 ft. **6-8 ft. trees, \$4.50 each; 8-10 ft. trees, \$5.50 each. Express not prepaid.**

Norway Maple

Graceful Drooping Weeping Willow

Niobe

Weeping Willow

A graceful weeping tree for lawn or beside a rock wall, for planting near pools, banks or streams. Has golden yellow bark, narrow green leaves, silvery beneath, and long, drooping branches.

	Each	2
4-5-ft. trees	\$1.50	\$2.75
5-6-ft. trees	2.00	3.75

MORaine LOCUST

(Plant Pat. 836)

This is a vigorous, fast-growing, seedless tree, shaped much like American Elm, but not susceptible to disease. A clean tree with no ugly, dangerous thorns, and no seed pods. The leaves are so fine that, when falling, they practically disappear into the grass.

Its branches arch up and out, giving a wide-spreading vase shape that reaches above a two story house with out obstructing the view or air circulation. Fine foliage makes plenty of cool shade, but lets enough sunlight through for good lawn growth, but not enough for crab grass growth.

Will thrive in spite of smoke and soot, on all kinds of soil. It is hard wooded; bends under strains of wind and snow, but rarely breaks or splits. **5-6 ft., \$6.00. Express not prepaid.**

LOMBARDY POPLAR

Good for Wind Screens

Tall, fast growing, spire-like tree. Adapted to wide range of soils. Everybody knows the striking appearance of this tall, narrow-growing tree, like a church spire. Ideal for screening, windbreaks and backgrounds. When used for these purposes, plant 5 to 6 feet apart.

	Each	10	100

Moraine Locust

Lombardy Poplar

Tree Hydrangea

TREE HYDRANGEA

Large, pyramidal trusses of pure snow-white blossoms appear in early August. As fall approaches, they change to a luminous pink. At this stage they may be cut for all winter, dry bouquets. Blossoms measure a foot long and 6 to 8 inches wide. A low growing tree, standing not more than 4 to 6 feet in height. **2 to 3 ft., \$2.35 each; 3 to 4 ft., \$2.75 each, postpaid.**

RUBY TREE

Prunus Pissardi

Leaves are purple and more lasting than many purple-leaf plants. Grows approximately 10 feet high and gives excellent foliage contrast in a shrub border. **3 to 4 ft., \$1.75 each; 4 to 5 feet, \$2.25 each, postpaid.**

Ruby Tree

DOUBLE FLOWERING PEACH

Large, brilliant, double red flowers all along the branches, makes the tree look like a large bouquet. A tremendous show at Peach-blossom time. Typical Peach foliage and is a very graceful small tree, growing to 10 ft. Does best in well-drained soil. Prune like any Peach tree. **3-4 ft., \$2.00 each; 3 for \$5.00, postpaid.**

MAGNOLIA SOULANGEANA

Fragrant, huge, tulip-shaped flowers in early spring, rose white inside, lively rose color outside. Leathery, deep green, waxy foliage follows the flowers, providing a restful mass of cool green for the summer. Makes an upright rounded tree growing to 12 to 14 feet. A magnificent lawn specimen, doing well in any soil having good drainage. **2-3 ft., blooming size, \$4.25 each, not postpaid.**

BECHTEL'S DOUBLE FLOWERING CRAB

Huge, double, light pink flowers hide the branches with rare beauty in the spring. Ideal for smaller lawn. Formal type; broad-symmetrical, pyramidal style. Distinct lobed leaves. **2-3 ft., \$1.75 each; 3 to 4 ft., \$2.50 each, postpaid.**

WHITE DOUBLE FLOWERING DOGWOOD. (Cornus Florida.) Has all the charm, artistry, and adaptability of the popular White Dogwood, and in addition bears double flowers. Very hardy and heavy-flowering. A small tree which grows in shade or sun and in ordinary soils, even in somewhat wet places. Typical bright red berries and red fall foliage. **3-4 ft. trees, \$2.50, not postpaid.**

RED FLOWERING DOGWOOD. (Cornus Florida Rubra.) Grows to a 12-ft. tree. Everyone knows this lovely artistic tree. Produces a great profusion of large rose-red flowers in the spring. Heavy with glossy red berries in the fall. A most adaptable tree; adds greatly to any landscape picture because of its fall fruit, red fall color and unique sympodial branching habit. **2½-3 ft. trees, \$3.50, not postpaid.**

REDBUD (Judas Tree.) Live pink flowers cover every twig and branch, producing a breath-taking display early in the spring. Makes a very graceful 20-ft. tree. Large, healthy, heart-shaped leaves add a tropical cast to the landscape picture. A beautiful specimen even in the smallest yard. Perfectly hardy and thrives anywhere. **3-4 ft. trees, \$2.00 each, not postpaid.**

WHITE CLUMP BIRCH. In naturalization, or as a lawn specimen, this lovely, multiple-stemmed tree is most effective. The white bark of its 3 or more trunks adds great charm to the landscape picture. The foliage is not too dense, and tends to soften, rather than hide, the sharp architectural lines of a building. Growth is gracefully upright, with horizontal branches. Reaches a height of 35 feet. **3-4 ft. trees, \$3.00 each, not postpaid.**

PAUL'S SCARLET HAWTHORN. Lovely flowering shrub or small tree, growing about 15 feet tall, with spreading branches. The leaves are broad, flowers a brilliant rosy red, double, in large clusters and produced in immense quantities. The fruits are scarlet. Well suited for the small yard. **Price: 4-5 ft., \$3.00 each, not postpaid.**

CUT LEAF WEEPING BIRCH. Graceful, weeping branches, finely cut foliage and shimmering white bark, make this one of the most beautiful trees. Even in winter, without foliage, the delicate pendulous branches make a lovely silhouette against a background of sky and naked trees. Although not particular as to soil, the Cut Leaf Weeping Birch prefers a moist location and a sunny spot. Grows to 35 ft. in height. **5-6 ft. trees, \$3.50 each, not postpaid.**

KWANZAN FLOWERING CHERRY. We have seen the spectacular Flowering Cherries in the Washington Tidal Basin, yet this one superb variety is always the most impressive. Trees bloom a year or two after transplanting. Grow 20-30 ft. tall. Double, bright rose-pink flowers completely clothe the branches in early spring. **3-4 ft. trees, \$3.25 each, not postpaid.**

Save Money!

LET US HELP YOU LANDSCAPE YOUR HOME AT NO EXTRA COST

Now you can enjoy experienced, professional advice on beautifying your home grounds without charge. Savings on your purchases often run as high as 30% to 50% when you buy direct from us, the growers.

EASY TO USE. All we need is a drawing or photograph of your home and grounds. A photograph is preferred. We also need to have approximate dimensions of the house and lawn.

Your photograph or drawing will be turned over to one of our experienced nurserymen, who has had years of experience in recommending and supervising landscape plantings. He will select the plants which will give you the most attractive arrangement for your grounds, and will send you a sketch indicating the location of each plant. Only plants best suited to your locality will be recommended. Complete instructions for planting will be included.

CATALOG PRICES. At the same time, he will tell you exactly what the plants he recommends will cost. There is no extra charge for our service. Your plants will be quoted at our regular catalog prices. No plans can be prepared after April 1st.

Kelly's Landscape Service is easy to use, economical and guaranteed to please you! Start now to beautify your home!

We make it very easy for you to make up your own planting list by using the charts that follow. All of the shrubs listed in our catalog are grouped in the various size categories. Complete description as to height at maturity, color and time of bloom, and where the plant is described and priced, is shown. In referring to the height at maturity, keep in mind that this is the height to which the plants will grow if not trimmed. If you want to keep them slightly smaller than the maturity height, all you have to do is trim them after blooming.

Group 1: These plants are ideal for foundation plantings under windows and where you want a more dwarf growing shrub.

Group 2: These plants are ideal for planting on the corners, between windows and as a background shrub for those listed in Group 1

Group 3: These plants are ideal for mass plantings, hedges or individual yard plantings.

Group 4: These plants are used primarily as specimen plants for tall hedges and screens.

Kelly's FLOWERING

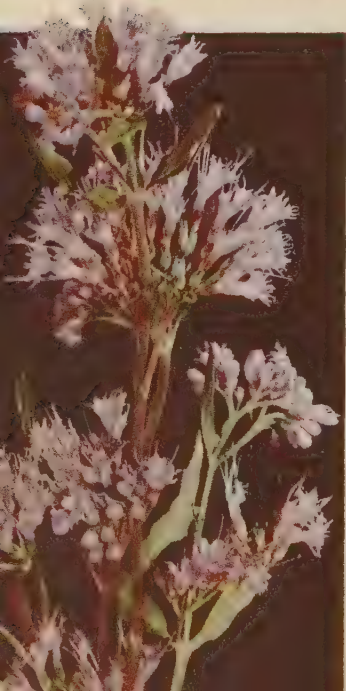

EUONYMUS ALATUS COMPACTUS

(Burning Bush)

Yellow flowers in May-June, followed by red fruits. In autumn the leaves turn brilliant coppery crimson tinged rose. Has an unusual corky bark. Thrives in partial shade or full sun. Perfectly hardy, makes a compact bushy plant 4 to 5 feet wide. Not particular as to soil. Very ornamental and attracts attention spring, summer, fall and winter. **Price: \$1.75 each; 2 for \$3.25, postpaid.**

SNOWBERRY

All Kelly Shrubs
Are Healthy
18-24 in. and
2-3 ft. Blooming
Size

FORSYTHIA, Lynwood Gold

This splendid new Forsythia originated in Ireland, and we predict it will replace before many years, all other varieties of deep yellow color. It is one of several fine shrubs we have obtained in Europe for distribution in this country.

The branches are erect and literally smothered under golden yellow flowers from top to bottom. Not only are the flowers produced in the most profuse manner, but the individual blooms are better and fuller in form as well as of greater substance, apparently never minding bad weather. For a magnificent show of golden yellow, there is nothing better. It is superb for cutting and flowering in the house during the winter months. It has been carefully tested for several years, and we recommend it without hesitation. Ultimate height 5 to 7 feet, depending on conditions.

\$2.00 each; 3 for \$5.50, postpaid.

HYPERICUM, Hidcote

From a famous estate in England comes this new variety. It grows into a twiggy shrub about 18 inches tall and about the same in diameter. Throughout the summer it is covered with bright yellow cuplike flowers, about 2 inches in diameter, in a grand mass display. Flowers are fragrant and appear late June, continuing until mid-October. **Price: \$2.00 each; 3 for \$5.50, postpaid.**

SNOWBERRY

Waxy Berries in Fall

Small, pink flowers in June or July. Waxy white berries from August until spring. Attractive, dense foliage, and the berries attract the birds. Grows under most adverse conditions to 4 feet high. **Price: 95c each; 3 for \$2.70, postpaid.**

HYDRANGEA PEEGEE

A tall, stately shrub growing to 4 feet in height. Branches bending over with giant cone-shaped flowers which are white at first, then pink and late in fall turning to copper and bronze. When cut, they last for weeks inside. **Price: 95c each; 3 for \$2.70, postpaid.**

The Exotic BLUE MIST Shrub

(Caryopteris)

One of the best low-growing, fall-blooming shrubs. It makes a neat, compact, rounded bush about 2 feet tall, with narrow, silvery green foliage. From August to frost, it is covered with the many clusters of dainty blue flowers. The roots are hardy, but like a Peony bush, you cut off, each spring, the old canes and new ones come up. You are sure to like this shrub. **95c each; 3 for \$2.70, postpaid.**

WEIGELA Eva Rathke

Famous for its scarlet, trumpet-shaped blooms and for its hardiness. Growing 3 to 5 feet high, it blooms heavily in June and moderately during the rest of the season. **Price: 95c each; 3 for \$2.70, postpaid.**

SHRUBS

All Kelly Shrubs are
Healthy 18-24 in. and
2-3 ft. Blooming Size

Variegated Weigela

An attractive shrub of spreading growth, attaining a height of 4 to 5 feet. Flowers are pale pink, trumpet-shaped, blooming in June. Foliage is a handsome green, edged with creamy white. **\$1.25 each; 2 for \$2.35.**

Althea, Rose of Sharon

A hardy 6- to 8-foot shrub, with shamrock-green leaves, forming a backdrop for double, Roselike flowers. A most welcome sight in the fall.

4 Colors:

Pink Red
Purple White
95c each; 3 for \$2.70
Postpaid

Ambler, Pa.

Gentlemen:

As a former customer, I am sending you another order. I have tried half a dozen nurseries and have whittled the number down to you and one other—as the most reliable.

Sincerely,
Philip D. Nordell

Blue Hydrangea

Blooms of charming blue throughout the summer. Most preferred of all Hydrangeas, due to its form and color. Soil should be very acid to bring out the blue color. To maintain soil acidity, mix 4 or 5 tablespoons of Aluminum Sulphate to a gallon of water, and apply to the soil for 2 to 3 weeks during the growing season. Aluminum Sulphate is listed on page 27. Grows in partial or full shade. Mound earth up around plant 10 or 12 inches for winter protection, same as for Roses. A real novelty. **Price: 12-18 in., \$1.75 each; 2 for \$3.00, postpaid.**

Red Spiraea

A choice, low growing shrub, distinctive in style and form. It produces masses of showy, bright crimson flower clusters in July, and if the old blooms are cut away, it will continue to bloom until frost. Nice for specimen planting as well as in groups. Ultimate height 18 to 24 inches. **Price: 95c each; 3 for \$2.70, postpaid.**

Gold Flame Honeysuckle

From June until freezing, this magnificent vine is covered with showy clusters of large, fragrant flowers, rosy-flame outside and gold inside. The attractive foliage, a rich blue-green, makes a perfect background for the brilliant flowers. Hardy, healthy, easy-to-grow, it thrives North, South, East and West, in full sun or partial shade. It can be used in so many places—trellis, porch, pergola, fence, fine for covering bank or cave or can be trained as a shrub. **Price: 95c each; 3 for \$2.70, postpaid.**

Hedge, Spiraea Van Houttei

*The
All-American
National
Favorite*

SPIRAEA VAN HOUTTEI

Probably the best known of all the shrubs. Will tolerate shade and adverse city conditions. Grow in any soil. The pure white flowers which completely cover the arching branches

Spiraea Van Houttei

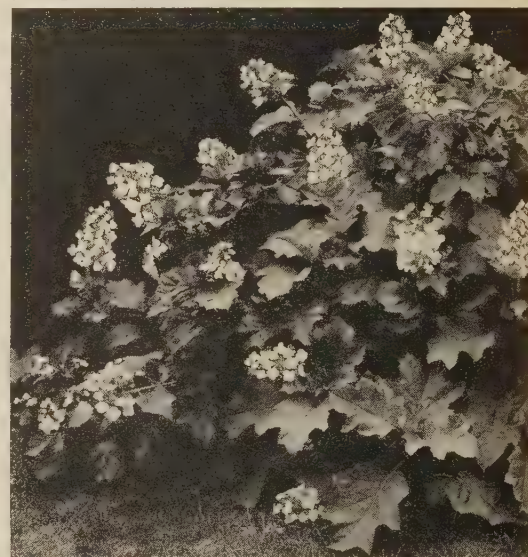

As an Individual Shrub

in May, transform the bush into a thing of beauty. This most popular Spiraea develops into a 4 to 6 ft. shrub, which may be used for specimen planting or for a hedge. It increases in beauty each successive season. Should be included in all plantings. **65c each; 3 for \$1.80; 10 for \$5.50; 50 for \$25.00, postpaid.**

Sweet Scented Viburnum (Viburnum Carlesi)

This grand shrub is generally called the Pink Snowball. In the spring it is covered from top to bottom with very fragrant flowers that are light pink on the outside and the inside snowy white. It makes a nicely shaped bush, 5 to 6 feet tall and just as wide, with branches right down to the ground. The deep green foliage colors a bronzy red in the fall. Is planted from coast to coast. It adds beauty and distinction to your planting. **18-24 in., \$2.95 each, postpaid.**

Oak-Leaf Hydrangea

Hardy in the North. Flowers are pinkish white, turning purple, appearing in June. The leaves are 3 to 5-lobed, whitish, woolly beneath. Height at maturity 6 to 8 ft. **95c each; 3 for \$2.70, postpaid.**

← Fragrant Lilacs

The living landmarks; hardy and vigorous in any soil or climate, growing 6 to 8 feet tall. Large clusters on Decoration Day, very fragrant. **Offered in both Purple and White. State color desired. Price: 95c each; 3 for \$2.70, postpaid.**

Deutzia →

PRIDE OF ROCHESTER

Vigorous, upright, hardy and free blooming. Small, white, Carnation-like flowers, changing to red in center. Grows 5 to 6 feet at maturity. **95c each; 3 for \$2.70, postpaid.**

New Beauty to Lawn or Garden

← RED TWIG DOGWOOD

(*Cornus alba sibirica*)

A spreading shrub with bright red bark in the winter, which adds a burst of color to your shrubbery in the winter. In summer it has bright green foliage, creamy white flowers in the spring, followed by whitish berries. Grows 6 to 7 feet tall. **95c each; 3 for \$2.70, postpaid.**

American Popular SNOWBALL

(*Viburnum opulus sterile*)

There are few June-flowering shrubs which can match the rare beauty of the pure white flowers arranged in perfectly round "snowballs" 3 to 4 inches across. It's a stately, erect grower dressed in beautiful rich green foliage. Makes a handsome 6 to 8-ft. specimen. **95c each; 3 for \$2.70, postpaid.**

Pink Bells of Weigela

WEIGELA ROSEA

June and July finds this perfectly formed, well rounded shrub a mass of light pink blossoms, which possess a great depth of color. Under favorable conditions it will continue to blossom until stopped by frost. The average ultimate height is 4 to 6 ft. **95c each; 3 for \$2.70, postpaid.**

← COTONEASTER DIVARICATA

(Spreading)

Is upright in growth, though the branches are spreading. The leaves are pointed, glossy green above, lighter below, turn red in autumn. The flowers are pink and appear in June. The fruit is oblong, ripening in August and September, and stays red for a long period. Grows 3-5 ft. **95c each; 3 for \$2.70, postpaid.**

Hills of Snow Hydrangea

A Grand Shrub for Shady Places

This easy growing shrub thrives everywhere and never fails to put on a display of showy, pure white, Snowball-like flowers. Grows approximately 3 feet tall. **95c each; 3 for \$2.70, postpaid.**

→ Spiraea Thunbergi

The Lacy Spiraea

A dwarf fountain-like bush that is very attractive at any time of the year. During the blooming season it is lavishly covered with delicate, snow-white flowers. **95c each; 3 for \$2.70, postpaid.**

Buy Shrubs Direct From The Grower...

SWEET HONEYSUCKLE

Lonicera Tartarica

Dainty, small, pink, trumpet-shaped flowers in May, followed by a profusion of red berries. Makes a large shrub, 6 to 8 feet both in height and width. Excellent for screening and specimen planting. Grows in the poorest soil. **Price: 95c each; 3 for \$2.70, postpaid.**

Plants.

GOLDEN PRIVET

Adds That "Bit of Color" to Every Planting

A striking shrub, growing to a height of 4 to 6 feet, but can be trimmed to any desired height or shape. Bright yellow foliage, making it a fine specimen or as a color accent in the shrub border. We offer especially bushy plants. **Price: 95c each; 3 for \$2.70, postpaid.**

BEAUTY BUSH

(*Kolkwitzia*). A magnificent specimen of flowering shrub, growing to a height of 7 feet. Of great beauty and most adaptable. The upright growing branches arch gracefully outward, and during the June blooming season, are weighted downward with lovely pink, bell-like flowers. Hardy and not too particular as to soil conditions. **95c each; 3 for \$2.70, postpaid.**

CALYCANTHUS

(Sweet-Scented Shrub)

Many know it as the Carolina Allspice. The handsome, bronze-chocolate flowers produced in June are most entrancing, because of their spicy fragrance. Odd looking pods develop later which are filled with brown, aromatic seeds. Glossy corrugated foliage adds to its unusual appearance. Grows 4 to 6 feet tall, and spreads over an area equally broad. **Price: 95c each; 3 for \$2.70, postpaid.**

SILVER LEAF DOGWOOD

(*Cornus elegantissima*.) Outstanding accent plant. Leaves deep green in center, with wide border of silvery white. White flowers in early June, followed by attractive white fruits in late summer. Red stems furnish interest in winter. Stands very wet soil conditions. **\$1.50 each; 2 for \$2.85, postpaid.**

EVERGREEN BITTERSWEET

(*Euonymus radicans vegetus*)

A wonderful berried vine. Can also be used as a shrub or colorful hedge.

Will climb brick or wood, or can be planted as a hedge. Makes an excellent shrub when pruned and does well in a northern exposure. Extremely hardy.

Price: \$1.25 each; 2 for \$2.35, postpaid.

DOUBLE MOCK ORANGE

(*Philadelphus*,
Virginal)

May and June finds the long slender erect branches heavily laden with lovely, pure white, sweet-scented double 2-inch flowers. Will tolerate smoke and other hard city conditions. Grows to an ultimate height of 4 to 6 ft. Price: 95c each; 3 for \$2.70, postpaid.

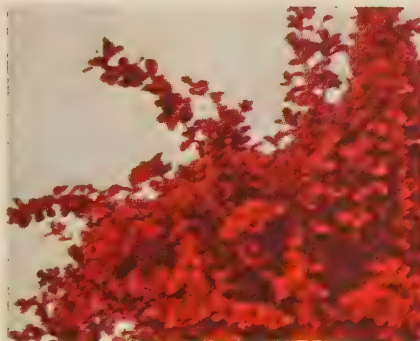

Double Mockorange

New! *Forsythia* "Spring Glory"

LARGER, BRILLIANT YELLOW BLOOMS FOR EARLIEST COLOR

A spectacular new Forsythia which bears such masses of so much larger blooms than older varieties that a mature plant in full bloom in early spring is an almost unbelievable sight. The brilliant large yellow florets completely cover the branches, giving the effect of a giant sunburst. Canes grow erect with gracefully drooping tips. Very hardy in all sections of the country and thrives and grows vigorously in ordinary soil. 2-yr., blooming size plants, 95c each; 3 for \$2.70, postpaid.

RED FLAME BUSH

Red-Leaved Barberry

Very charming all season with its flattering bronze-red foliage. Adds that spot of color needed to brighten up the landscape. Must be planted in a sunny location to maintain its rich red coloring. Grows naturally to a height of 3 feet, but may be pruned to any size or shape desired. Price: 90c each; 3 for \$2.55, postpaid.

Rose Gold PUSSY WILLOW

New. In late February or March has thousands of silvery catkins which progress through a fascinating series of color changes. First silvery gray, then turn silvery pink, then rosy pink dotted with hundreds of bright yellow stamens, finally become nearly solid gold. Low mounded plant. Attractive silvery foliage stays until winter. Catkins large, last for weeks and weeks. Can be forced indoors. \$1.50 each; 3 for \$3.75, postpaid.

All Kelly Shrubs
Are Healthy
18-24 in. and
2-3 ft.
Blooming Size

VITEX

The Distinctive
Lavender Shrub

A 4-foot, dainty shrub of branching habit, which bears long spikes of lavender-blue flowers, forming a beautiful contrast to the silvery green foliage in August and September. Price: 95c each; 3 for \$2.70, postpaid.

Everblooming Pink Spirea

(*S. macrothyrsa*). The finest Spirea ever introduced. Enormous spikes of cameo-pink flowers up to 12 inches long on strong stems up to 4 feet long. Will bloom all summer if flowers are kept cut. Excellent foliage; no pests. Grows in any ordinary soil, and can stand a little shade. \$1.00 each; 3 for \$2.75, postpaid.

Kelly's Flowering Shrubs for Colorful Gardens

Deutzia Gracilis

A charming little "must" for every garden. Slender twigs covered with white flowers in May and June. Generally attains a height of 3 feet when fully matured. **95c each; 3 for \$2.70, postpaid.**

Althea Coelestis

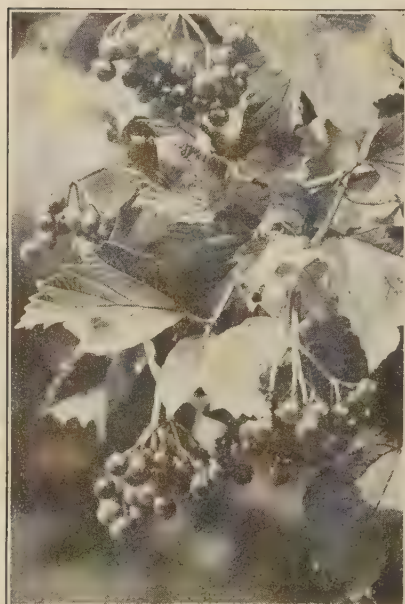

Bright morning-glory-blue flowers, 3 inches across, pop open every day from midsummer until winter. Pretty pansy-red centers and white pistils. Fine for cutting. Fancy green leaves. Grows 4 to 5 feet tall. **95c each; 3 for \$2.70, postpaid.**

Althea

HIGHBUSH CRANBERRY

One of the finest background and screen shrubs. Upright-spreading habit and healthy, deep green, 3-lobed leaves. Flowers heavily in May and June—white, flat clusters. Large clusters of scarlet berries remain in winter, make a valued tart jelly. Bright red fall foliage color. Grows equally well in shade or sun and in normal to wet soils. **\$1.25 each; 2 for \$2.25, postpaid.**

American Cranberry Bush

FRENCH PUSSY WILLOW

No bouquet would be complete in early spring without a few sprays of Pussy Willows. Grows 10 to 12 ft. high. Catkins are at least twice as large as those of the common Willow. **95c each; 3 for \$2.70, postpaid.**

Minnesota Snowflake

(Plant Pat. No. 538)

The NEW outstanding Mockorange, beautiful as a Gardenia. The flowers are large, double, with orange blossom fragrance. The season of flowering is early summer. This plant is thoroughly hardy, a vigorous grower and long-lived. It will grow to a height of 8 feet. It can be kept to the desired height by trimming. It is a strong grower; therefore very useful for screen, tall border and specimen plantings. **\$1.25 each; 2 for \$2.25, postpaid.**

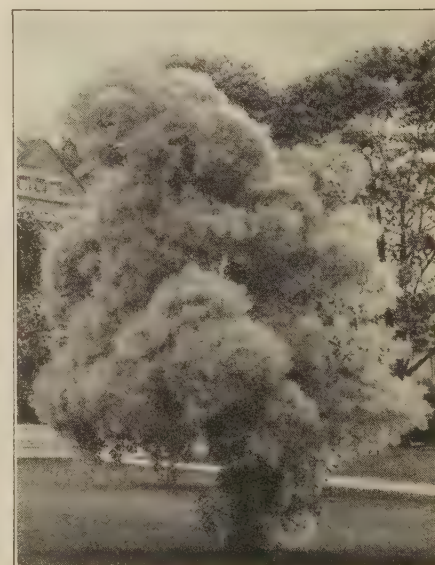

Minnesota Snowflake

PURPLE FRINGE

or Smoke Tree

A tree much admired for its curious fringe or hairlike flowers that cover the whole surface of the plant. Handsome foliage adds its share of beauty to the plant. Likes plenty of sunshine and light, well drained soil. Grows to a height of 10 to 12 feet, and its spreading habit requires considerable space. Especially desirable as a specimen tree. **2-3 ft., \$1.75 each, postpaid.**

Lilac Spiraea

Gold Drop Potentilla

A charming, small, compact growing shrub which is cheerfully brilliant throughout the entire summer and fall. It is closely and densely covered with fern-like leaves, studded with intensely brilliant golden yellow, Buttercup-like flowers. A mound of green and gold all season. **\$1.25 each; 2 for \$2.35, postpaid.**

Sweet Pea Shrub

(*Robinia hispida*). 7 ft. Long, graceful clusters of pea-shaped, rose-colored flowers are borne on strong, but gently nodding stems in May and June. The plant is not particular as to soil and will grow almost anywhere. Excellent for planting on banks. The foliage is quite decorative, somewhat resembling that of the Wisteria. **\$1.10 each; 3 for \$3.00, postpaid.**

Sweet Pea Shrub

The Lovely Flowering Zabeli Honeysuckle

(*Lonicera zabeli*). The most shapely bush and the finest foliage of all the bush Honeysuckles. A marvelous accent or specimen shrub. If you want a stunning flowering hedge at 4 to 5 feet, this is it. Sturdy, upright growth; attractive blue-green leaves; profuse red flowers in spring and long-lasting red berries late summer and fall. If you wish to keep it thick and formally trimmed, plant 1½ feet apart, but for its true, informal beauty, plant 3 feet apart. **\$1.00 each; 2 for \$1.90, postpaid.**

← Lilac Spiraea

Spiraea Billiardi

An upright habit of growth and long, narrow panicles of bright rose flowers make this a splendid Spiraea. It blooms in July and August, and does fairly well in partial shade. Height 4 to 6 feet. **95c each; 3 for \$2.70, postpaid.**

Zabeli Honeysuckle

Nanking Cherry

← Nanking Cherry

(*Prunus tomentosa*.) 5 feet. A fine shrub with attractive, clean looking foliage. The stems are covered with a profusion of Cherrylike bloom before the leaves appear in early spring. The fruit, an attractive bright red Cherry, is similar to sour red Cherry in flavor. Good for pies and jam. A good plant for filling the corner between house and porch. **\$1.25 each; 3 for \$3.50, postpaid.**

Winterberry →

Euonymus Radicans Erecta.

A broad, spreading shrub clothed in rich bright green foliage that remains on the plant year round. It's a plant that blends well with established Evergreen plantings. Thrives in sun or partial shade. Makes a shapely bush 4-5 ft. tall with red berries which hang on late in the season. This is not an ordinary shrub. Be the first to have it in your neighborhood. **\$1.25 each; 2 for \$2.25, postpaid.**

Winterberry

Kelly's

FLOWERING SHRUBS

PINK FLOWERING ALMOND

A charming, old-fashioned early spring flowering shrub, growing to a height of 4 feet. Unsurpassed in beauty when completely covered with a mass of very double, vivid pink blossoms, which appear in great profusion before the leaves unfold. **95c each; 3 for \$2.70, postpaid.**

GOLDEN SYRINGA (Philadelphus Aurea)

Always a "showy" shrub because of its all-season golden yellow foliage. Flowers are intensely white, with a fragrance which is delightful, more delicate, yet as penetrating in the garden as that of the Jasmine. Grows to a height of 4 to 5 feet, and is not fussy about location—doing well in smoky or dusty places. **\$1.50 each; 2 for \$2.85, postpaid.**

CORALBERRY Indian Currant

A 3 to 4 ft. shrub with delicate, little, pink flowers against a reddish green foliage, followed by coral colored berries that remain most of the winter. Keep birds near, with abundance of these berries. **95c each; 3 for \$2.70, postpaid.**

SCARLET QUINCE The Fire Bush

A first choice for rich, happy spring color for both indoor and outdoor beauty. Covered with masses of semi-double, brilliant scarlet flowers, even before the attractive shiny green leaves appear. Quince-shaped, fragrant fruit which makes excellent jelly and marmalade follows and adds to the attractiveness of this 3 to 5 ft. "must" in landscaping. **95c each; 3 for \$2.70, postpaid.**

The Feathery TAMARIX

SUMMER GLOW. There is a lacy loveliness and charm about this shrub not found in others. Beautiful silvery blue-gray foliage is like a veil. A sharp and delightful contrast is made by the airy Tyrian rose flower spikes appearing on top of the delightful foliage all summer. Lovely for cutting. Very tolerant to salt air and wind. Ultimate height about 8 feet. Can be pruned and kept to 5 to 6 feet if desired. **\$1.50 each; 2 for \$2.95, postpaid.**

3 Grand BUDDLEIAS

CHARMING. Long sprays of lavender-pink.
DUBONNET. Large sprays of wine-red.
ILE DE FRANCE. Violet-purple, and very fragrant.

The late Summer Lilac. Resembles Lilacs in shape and appearance. Long, slender spikes through late summer and fall. Plants grow 4 to 5 feet tall.

**Each 95c;
3 for \$2.70,
postpaid**

Lilacs

Plant Early This Spring For Next Summer's Bloom

You are sure to enjoy these beautiful French Hybrid Lilacs. All double flowering varieties that will last a lifetime. You get a wealth of sweetly perfumed blossoms the first year after planting, and they will bloom every year. We highly recommend the varieties listed.

BLUE (Marc Micheli). Soft blue-violet in large clusters. A great favorite.

WHITE (Mme. Casimir Perier). Very large, compact clusters of purest white.

WINE-RED (Charles Joly). Its narrow, upright habit of growth is adapted to the smaller garden where space is limited.

PINK (Katharine Havemeyer). A gorgeous mass of double flowers, very full with immense spikes.

LAVENDER (Michel Buchner). Midseason. Bluish lilac.)

2 to 2 1/2-ft. plants, each \$1.75;
3 for \$4.95, postpaid

Michel Buchner

Mme. Casimir Perier

Katharine Havemeyer

Double GOLDEN KERRIA

The Globe Flower

Truly year around beauty. The button-like golden flowers cover the bush all summer. The very dense "saw-tooth" foliage serves as an interesting background. In winter the light green twiggly stems are very decorative. Grows 3-5 feet tall.

95c each; 3 for \$2.70, postpaid.

Cushion-Mum

PRODUCE BUSHELS OF BLOOMS

A Sensational Creation of the Flower Kingdom

One of the most popular garden favorites. Plant these beautiful flowers 2 to 2 1/2 feet apart in well-drained soil. They do well in full sun or partial shade. Our Cushion Mums are hardy and will bloom from late August up to the time of severe frosts.

BRONZE CUSHION. A large round plant if planted alone with hundreds of blossoms on at the same time. Requires little care, and is one of the prettiest ones of the Cushion Mums.

PINK CUSHION. It's the oldest one of the Cushion Mums, but one of the best. Makes a very large plant by early fall, loaded with blooms, often hiding all the leaves when fully in bloom. It's a sight in early September till late fall.

RED CUSHION. Blossoms are fiery red color that blends in well with the others. It has been known to have 500 blooms and some buds on 5 months after set out. Starts to bloom in September and continues until freezing weather.

YELLOW CUSHION. A bright yellow and blooms earlier than other colors. A thousand blooms open at one time on a well cared for plant is a common sight. Every one likes a yellow Mum.

60c each; 3 for \$1.75; 6 for \$3.00, postpaid.

EVERGREENS

Strong Sturdy Plants - Best Varieties

The Deep Rich Tones Enhance the Beauty of Your Summer Garden and Furnish Winter's Cheer

Distinctive, luxuriant, colorful varieties for planting AVERAGE HOMES.

ECONOMY SIZE—Sure to Grow into Beauty. All our small and medium size evergreens are shipped with roots packed in peat or moss as a protective feature.

PURPLE SPREADING ANDORRA JUNIPER

Low and spreading, seldom reaching more than 15 to 18 inches in height, but will spread out for several feet. Particularly desirable because of the gray-green summer color and the pinkish fall and winter color. Especially desirable for planting in groups or as a border to taller trees or for covering banks. **9-12 in., heavy transplants, \$1.50 each; 2 for \$2.90, Postpaid.**

BLUE PFITZER'S JUNIPER—JUNIPER HETZI

This evergreen grows like its parent, the Pfitzer's Juniper, of which it is a sport. A much more rapid grower with a decidedly blue cast. It is a dense grower and very beautiful. Likes plenty of trimming. **10-15 in., heavy transplants, \$1.75 each; 2 for \$3.25, Postpaid.**

Hicks' Yew Taxus Hicksi

A narrow, upright Taxus with vertical branches. Can be kept trimmed to a desired shape and height. It has rich, dark, glossy green color, making it very popular. Tree resistant to extremes of heat and drought. **12-18 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

TAXUS - Yew

SPREADING JAPANESE YEW, TAXUS CUSPIDATA. This evergreen usually grows more wide than tall. Branches out from the bottom with several stems, developing into a bush form. Rich, dark green foliage with numerous crimson berries in the fall. Does well in sunny and northern exposures. Fine for foundation plantings. **12-18 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

TAXUS CAPITATA

(Upright Japanese Yew.)
The normal habit of this

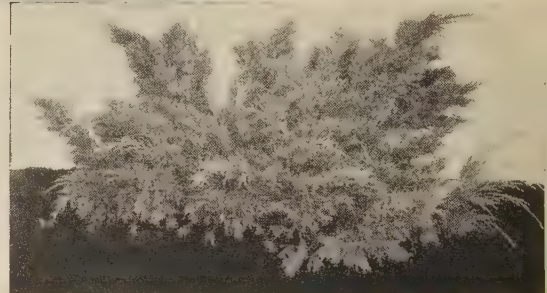

Yew is a pyramidal form, broad at the base and tapering to the top of the tree. A rapid growing tree, so can be trimmed back at least twice during the summer. **12-18 in. transplants, \$2.25 each; 2 for \$4.25.**

AMERICAN ARBOR-VITAE. The mother tree of all Arbor-Vitae. Likes a sunny location but will stand some shade. A moist location is preferred. Stands trimming well. For this reason is widely used for hedge purposes. Grows bushy at the bottom, tapering at the top. **12-15 in. transplants, \$1.75 each; 2 for \$3.25, postpaid.**

Pyramidal Arbor-Vitae

On account of its rapid growth, its bright green color, its shapely even pyramidal habit and ease of trimming, this evergreen ranks among the leading ones for the Eastern United States. Will grow 15 feet tall but seldom over 2 feet in diameter. May be freely cut and trimmed and thereby kept within any bounds necessary. **12-18 in., heavy transplants, \$2.00 each; 2 for \$3.90, postpaid.**

SPREADING PFITZER'S JUNIPER. This evergreen naturally grows in a low, wide spreading habit. It will stand considerable shade and crowding, which makes it a favorite for foundation and informal plantings. If kept untrimmed, will spread 4 to 5 feet. Can be kept low to the ground by trimming. **10-15 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

GLOBE ARBOR-VITAE. A natural globe-shaped evergreen. Has broad fan-shaped leaflets. It is dwarf in its habit of growth, usually not growing over 3 feet tall or 3 feet in diameter. Fine for doorway and foundation planting or for formal designs, tubs and urns. **8-10 in., heavy transplants, \$1.50 each; 2 for \$2.90, postpaid.**

The Queen of Your Garden — Lilies Never Fail to Bloom

REGAL LILY. One of the hardiest Lilies in cultivation. Stems grow 4 to 5 feet high on which are produced gorgeous large white flowers, the center of which is flushed with yellow, shading to brown on the "ribs." The almost transparent petals have a delightful pearly tint. The Regal Lily when rightly established will produce from 15 to 20 flowers each year. **45c each; 4 for \$1.75; 8 for \$3.45, postpaid.**

A TRUE PINK LILY (*Lilium speciosum rubrum*). Wonderfully beautiful and perfectly hardy. Heads of 10 or more delicately fragrant, rose-pink blooms daintily dotted with crimson, on 3 to 4-foot plants. Excellent in the garden and for bouquets or corsages. Blooms in August. **75c each; 4 for \$2.85; 8 for \$5.45, postpaid.**

THE GARDEN EASTER LILY (Estate Lily). The same lovely, pure white flowers, rich green foliage, and delightful fragrance in the August garden that is so familiar at the Easter season. Hardy, too. 2½ ft. **50c each; 4 for \$1.85; 8 for \$3.45, postpaid.**

Tuberous Rooted Begonias

Tuberous Rooted Begonias

They Bloom in the Shade

One of the most beautiful and valuable summer and winter blooming plants for shady locations. Nothing exceeds their brilliance, exquisite form and magnificent colors. They are excellent in the garden and easy to grow in pots for indoor blooms winter and summer. Bulbs can be used over many years. Grow best in shady locations, under trees, shrubs, in porch boxes, hanging baskets on north side of buildings.

BEGONIAS. Your choice of 6 lovely colors: Red, White, Salmon, Yellow, Pink and Orange.

SELECTED BULBS 1¼-1½ in. in diameter. Complete with instructions. **6 for \$1.00; 12 for \$1.90; 24 for \$3.70, postpaid.**

Floribunda ROSES

for Masses of Color
Hedges — Rose Gardens —
Shrubbery Border

FLORADORA

Dazzling bright cinnabar color with shades of scarlet. Buds are exquisitely formed, produced in profusion on a neat, symmetrical bush. Foliage glossy olive-green. Grows to a height of 2½ feet. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

VOGUE (Patent No. 926)

The Sensational New Floribunda. An intensive brilliant cherry-coral color with perfectly formed, high-centered, Hybrid Tea-shaped, 3 to 4 in. flowers. Has a delightful fragrance. Grows exceedingly well, reaching a height of 2½ to 3 ft. or more. **Prices: \$2.25 each; 3 for \$6.00, postpaid.**

IMPROVED LAFAYETTE

Medium-sized, deep glowing red flowers, suffused with vivid crimson. Blooms profusely. One of the finest Roses for bedding, flowering without fail until hard frost. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

FASHION (Patent No. 789)

Finest Floribunda Rose ever created. Oriental red buds open gradually to a lighter, luminous coral suffused with gold. Constant new growth replaces the old, so it is always covered with clusters of exquisite blooms. Height 2½ to 3 ft. **Prices: \$2.00 each; 3 for \$5.25, postpaid.**

RED RIPPLES

A clear true red in both bud and open flower, continuously produced on a strong plant 3 to 4 feet tall. In our modest opinion there is none better. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

PINOCCHIO (Patent No. 484)

Extremely hardy, always in bloom with clusters of exquisite pointed buds of rich salmon, flushed with gold at base, gradually changing to soft clear pink with deeper pink edges. Fruity fragrance. Height 2 ft. **Prices: \$1.50 each; 3 for \$3.90, postpaid.**

CAMEO

Color shell-pink and salmon with a glow of gold. Massive clusters of small, long-lasting, semi-double flowers. Very slight fragrance. The "hedging Rose" unsurpassed for mass color, vigorous growth and abundance of healthy foliage. Grows to a height of approximately 2 to 3 ft. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

ELSE POULSEN

Color, bright, lasting rose-pink. Great clusters of medium to large-semi-double, open flowers are borne on long cutting stems. Mild but delightful fragrance. An erect, thrifty bush that is ideal to use in combination with flowering shrubs in foundation and border plantings. Grows to a height of approximately 3 to 4 ft. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

GOLDEN SALMON

Blooms in dazzling orange-salmon. A Rose that you will love more and more as you observe its masses of blooms in your own garden next season. Very tough and easy to grow. Four or five plants in a group make an amazing display even in large gardens. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

You Want Your Roses to Grow and Bloom Satisfactorily—So Do We— Pay Particular Attention to the Instructions Below

Consider these simple instructions and you will have little difficulty in growing beautiful Roses.

Roses like a sunny location and should have at least a half day's sun. Any good garden soil that is well drained will be excellent for Roses. Fertilizer or well rotted manure if available should be worked into the soil.

Unpack and plant Roses as soon as received from the nursery if at all possible. If you cannot plant at once, unwrap the plants and heel in the ground until ready to plant in a permanent location.

In planting, set the plants with the bud, or joint, just above the roots, about 2 inches below the surface of the soil. Have holes large enough to avoid crowding the roots and be sure the soil used for back-filling is finely pulverized. Tramp soil firmly a couple of times as the hole is filled and leave a slight depression around each plant to retain water.

As soon as planting is completed see that all plants and the soil around them is soaked thoroughly. After the water has settled, hill the dirt up around each plant to a height of 6 inches. As soon as the plant begins to sprout buds, level off this dirt to your bed level.

Keep the Rose planting well watered at all times. To discourage mildew, only water in the morning or irrigate the bed, being careful not to wet the foliage too much. A reasonable application of fertilizer applied twice during the summer months, with an interval of at least 30 days between applications, will induce added growth and extra quality in blooms.

Each succeeding Spring all canes should be cut back to 6 inches. This causes strong new growth and abundant bloom to develop. For winter protection in cold climates, hill the dirt up around each plant to a height of 8 to 12 inches in late fall before the ground freezes. Level off as soon as danger of hard frosts is over in spring and cut plants back as directed.

How to Prune

Properly pruned
and planted

Kelly's HEAVY FLOWERING Climbing Roses

BLAZE. (Red.) Plant Patent 10. Grows in true pillar form. Blooms early, followed by repeat blooms throughout the summer and fall seasons. Plants hardy, bright green foliage and sturdy canes. Color is intermediate scarlet and does not fade readily. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CLIMBING AMERICAN BEAUTY. Has been a national favorite in the Rose garden for over two decades. A very fragrant, very beautiful rosy-carmine variety that heaps and piles its blooms all over your trellis, porch or fence. Large brilliant flowers. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CLIMBING PEACE. Plant Patent No. 932. Peace is now a top favorite with Rose growers everywhere. This new climbing sport has the same fine foliage and strong stems and will give you the same huge perfectly formed flowers as the ever popular Hybrid Tea. The full ovoid bud is deep yellow with the edges of the petals picoteed cerise. It slowly opens to a glorious 5-inch bloom with shades of canary-yellow, pale gold, cream, pearly white, and Apple blossom. **\$2.50 each; 3 for \$6.60, postpaid.**

CLIMBING SNOWBIRD. A small to medium sized climbing Rose, but one that is a real asset to any Rose garden. Almost never is it without exquisite, long, flaring, white buds and snowy, many-petaled, high-centered flowers. Our guess is that it will outbloom any other white Rose in your garden by at least two to one. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CRIMSON GLORY. Plant Patent No. 736. Imagine the magnificent Crimson Glory in the form of a Climber! The rich crimson color, the fascinating fragrance, the perfectly formed blooms and all the vigor and profusion that makes this Rose outstanding in its Hybrid Tea form, have been captured in this amazing Climber. Large, high-centered crimson Roses on strong stems cover the plant for a long period. **\$2.00 each; 3 for \$5.25, postpaid.**

GOLDEN CLIMBER. Climbing form of the beautiful Tea Rose "Golden Charm." We recommend this to those of you who want a golden yellow climber to complete your color range. Vigorous grower and blooms resemble those of the Hybrid Tea. May be cut in bud and keep well as blooms open. Buds are deep yellow opening into lighter yellow petals. Fragrant. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

The Famous Paul's Scarlet Climbing Rose

NEW DAWN. (Pink.) Perfect Hybrid-Tea-like blooms all season of Apple-blossom-pink, and a delicate appealing old rose fragrance. Superb for use in bouquets and arrangements. Fine long stems. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

PAUL'S SCARLET CLIMBER. Midseason. Vivid scarlet and marveously attractive, with a great mass of bloom. The colorful show keeps up for weeks. The brilliant color does not burn or fade and the bloom in June is profuse, in great clusters all over the plant. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

All-America

Charlotte Armstrong

Plant Pat. 455. A Rose of unusual color, blood-red in the bud, opening to cerise in hot weather and to spectrum-red in cool weather. Long pointed bud, flower 3 or 4 inches in diameter. Foliage leathery, semi-glossy, deep green and resistant to mildew. **Price: \$2.00 each 3 for \$5.25; 12 for \$21.00.**

Special Patented Rose Collection

7 Varieties Illustrated on These Pages

Only \$11.95 Postpaid

Tree Roses

Truly the aristocrat in the garden. Breath taking loveliness that grow on straight stems from 3-4 feet high.

An umbrella of color blooms, our clients will welcome these Tree Roses as a favored addition in the garden.

Colors available: Pink, Yellow, Duo-tone, Red. **Price: \$5.50 each; 2 for \$10.00, postpaid.**

Mirandy

Plant Pat. 632. All-America selection. Large, ovoid buds open fully double. Deep red flowers, having texture and pile of velvet, a delicious, spicy fragrance. Long, sturdy stems, fine for cutting. Altogether, this is the finest red Rose we have seen. **Price: \$1.75 each; 3 for \$4.65; 12 for \$18.60.**

Forty-Niner

Plant Pat. 792. Probably most brilliant bi-colored Rose ever introduced. Inside of petals vivid Oriental red, outside of petals rich chrome-yellow, sometimes overlaid with pink. Long pointed buds open to well-shaped flowers. Fragrance mild and pleasing. Plants tall and upright, resistant to disease. **Price: \$2.00 each; 3 for \$5.25; 12 for \$21.00.**

Rose Winners

New Yorker

Plant Pat. 823. The perfectly formed, high-centered blooms are scarlet with rose-red undertones, each petal is overlaid with rich sheen of velvet. Plants bloom heavily in June on 3-foot plants, with a succession of flowers from then until cold weather. **Price: \$2.00 each; 3 for \$5.25; 12 for \$21.00.**

Sutter's Gold

Plant Pat. 885. Buds are elongated nuggets of gold delicately made and etched with rich, tawny carmine. Plants upstanding and vigorous with healthy, dark green foliage. Does well in all parts of the country. **Price: \$2.25 each; 3 for \$6.00; 12 for \$24.00.**

Peace

Plant Pat. 591. All-America selection. The bud a rich golden yellow with pink markings. As flowers open, the pink seems to deepen until, as they come to their full high-crowned glory, the golden color fades first to attractive ivory, then to alabaster-white and the pink blush spreads and deepens along the edge of each petal. Plants produce many flowers at once and they can be seen in all stages. The whole effect is of several different Roses on one plant. **Price: \$2.00 each; 3 for \$5.25; 12 for \$21.00.**

Crimson Glory

Plant Pat. 105. Buds large, urn-shaped, followed by well formed flowers of an intense deep vivid crimson shaded oxblood-red and mellowed by a soft velvety nap. Plants branch freely, producing a well spread, yet compact bush of good symmetry. **Price: \$1.75 each; 3 for \$4.65; 12 for \$18.60.**

Kelly's

CLIMBING VINES

Add Beauty on Trellis or Porch

SILVERLACE VINE

(Fleece Flower)

The delicate fleece-like flower resembles the finest white lace. Blooms heavily from midsummer until fall. Grows about 20 feet the first season.

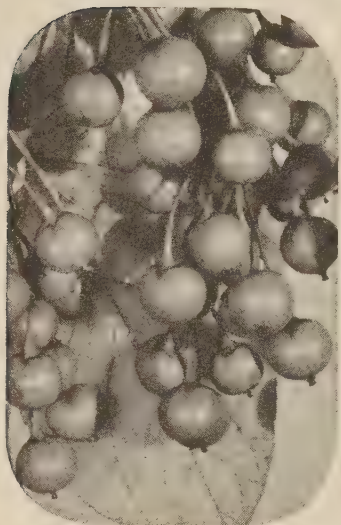

\$1.15 each
2 for \$2.25
Postpaid

BOSTON IVY VINES

A vigorous climber that seems to thrive even under smoky city conditions. Bears a rich mass of dark green foliage. It will cling to almost any surface and its rich autumn color makes it most desirable for planting.

Postpaid

Bank and Foundation Covers

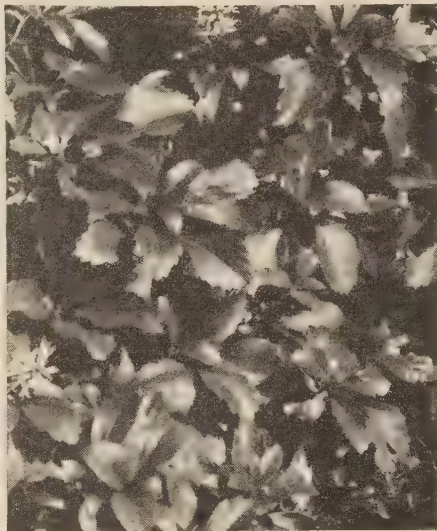

Provide a natural effect where grass will not grow

PACHYSANDRA TERMINALIS

(Japanese Spurge)

EVERGREEN GROUND COVER

The most popular of evergreen ground covers. It spreads rapidly, giving a finished look to an underplanting. Since it thrives in the shade, it is especially useful under dense shade trees where grass will not survive. Also good for a steep bank when mowing is difficult. Very useful as a combined ground cover and root protector when planted under Rhododendrons, Azaleas, and Laurels. Pachysandra puts the finishing touch to a foundation planting. Plant 4 or more to 1 square foot.

100 for 8.00
250 for 17.50
500 for 32.50
1000 for 59.95

CREeping HONEY- SUCKLE

HALL'S HONEY-SUCKLE VINE

Trumpet-shaped flowers of white and gold are very fragrant and remain during the entire summer, until killed by early winter freezes. The foliage remains green during the winter where it has protection of snow or mulch. An excellent ground cover for steep banks. Will also climb on trellis or tree trunk. The fruit is yellow. Very showy against green leaves in the winter. Often grows to a length of 10 to 15 feet.

Postpaid

The Living Fence

ROSA MULTIFLORA

**Controls Erosion • Provides Wild Life Refuge
Adds Beauty to the Landscape**

Rosa Multiflora is Nothing New. It is the understock or root on which named Rose varieties are budded. Originally it was imported from Japan. It has come into prominence as a result of work done by the U. S. Department of Agriculture on erosion control in the western states. Because of its fast growth and hardiness, it has also been used on large farms and estates for fences. Extensive advertising taking advantage of the name Rose, has brought the plant into big demand as a hedge for small properties. We grow the plant and want to sell it, but are zealous in our obligation to our customers in stating that we can't recommend Rosa Multiflora for small lots. We will gladly sell it to you if you want to try, but we would not want you to be led astray by the glamorous claims that have been made for it.

Facts About the Rosa Multiflora and its Growth

1. Can be planted 1 foot apart. Its thorns will keep children and animals of all kinds in bounds.
2. Produces dense growth—white blossoms in June—red berries in late summer and fall.
3. Extremely hardy—Does well in most all soils.
4. Extensive pruning during the growing season required to keep the hedge small.
5. Grows 8 feet or more in height and 6 to 8 feet in width if not kept trimmed.
6. The red berries will attract birds of all kinds, including pheasants and grouse.
7. Grows 2 to 3 feet in one season.
8. Ideal as a ground cover on steep banks and slopes.

Rose Fence

9. Plant just as you would any other shrub.
10. Requires no special care. Not subject to any serious diseases or insect attacks.

For a good thick hedge, the plants should be trimmed back to 6 or 8 inches to promote thick growth. You can, therefore, see there is no advantage in planting larger size plants than we offer.

FAMOUS HOPA CRAB

From early spring until freezing weather, this tree will be a delight to you. The beautiful deep red blossoms distinguish the Hopa Crab from other varieties. Before the leaves are fully developed the whole tree bursts into bloom, being completely covered with the most magnificent fragrant red flowers. It is hard to imagine anything more beautiful. The foliage is dark green with red cast. Flowers are followed by the prettiest tiny red Apples that bejewel the tree during the summer, and these can be used for jellies. The tree is half round in shape, growing to a spread of 15 ft. and a height of from 12 to 18 ft.

4-5 ft. trees \$2.25 each; 2 for \$4.25

The Charming

Mrs. Cholmondeley A Clematis DeLuxe

Wisteria-blue is featured by this lady with the long name and the color, we think, is far more remarkable than the name. Rare delicacy of color and large, open flowers, borne in profusion, are desirable qualities for summer-flowering vines, and it is extraordinary to find such an unusual tone of blue in this group of plants. **Price: \$1.50 each; 2 for \$2.75, postpaid.**

From Holland - Azalea Mollis

Their flowers are lovely and add so much to any planting. We have imported these from Holland. Large blossoms, blooming in early spring. Fine bushy plants, about a foot tall. They prefer part shade, and do best in a soil mixed half and half with Peat Moss. The roots are very close to the surface, so a Peat Moss mulch should be kept around the plants after setting out. Keep well watered. We offer them in the following colors:

Red, Orange, Yellow, \$2.25 each; 3 for \$6.25, postpaid.

CHINESE ELM

For Any Size Hedge

Extremely Hardy—Rapid Grower

This is America's fastest growing hedge, making a good showing in just a few months. It is the first to leaf out in the spring and one of the last to shed in late fall. You can trim to any desired height from 3 to 10 feet, as a hedge or tall screen. The more you trim it the more dense and compact it becomes. We recommend that after planting, you cut off nearly all the top, leaving only 3 to 4 inches above ground. Plant 8 inches apart.

The Effective BLUE LEAF HEDGE

A new, charming, silvery blue-green shrub. Grows anywhere, in sun or shade, dry, wet or heavy soils where other plants perish. If left untrimmed, its feathery, willowy foliage makes a beautiful, compact, dwarf hedge 3 feet high and 2 feet wide. If trimmed it makes a colorful, low, formal hedge. Just the thing for low edgings, around beds or along walks. Single specimens are delightful in rock gardens. **10 for \$3.95; 50 for \$16.95; 100 for \$30.00, not postpaid.**

PLANTING AIDS

Rhododendrons and Kalmia require an acid soil ph 5.0-6.0. See page 31 for directions for making soil acid. Besides using Aluminum Sulphate, use plenty of leaf mold or peat moss around the roots of the plants. They do well in the shade where there is a good amount of moisture.

PEONIES in a Blaze of Color

Superb Varieties That Will "Color Emphasize" Your Garden

Spring is a Good Planting Time for Peonies

Price: 95c each; 3 for \$2.70; 6 for \$5.20. Postpaid

The roots offered are strong 3- to 5-eye divisions, true to name, from healthy 3-year-old clumps.

Number after name of variety represents rating given it by the American Peony Society.

BARONESS SCHROEDER. 9.0. Immense globular flowers of delicate blush changing to pure white. Midseason.

EDULIS SUPERBA. 7.6. Deep pink. Very early.

FELIX CROUSSE. 8.4. Bright ruby-red. Midseason.

FESTIVA MAXIMA. 9.3. White, center crimson-flecked. Early.

KARL ROSENFELD. 8.8. Brilliant dark crimson. Midseason.

SARAH BERNHARDT. 9.0. Flowers of remarkable size in clusters full and double; apple-blossom-pink with each petal silver-tipped. Late.

Karl Rosenfield

Karl Rosenfield—A Lovely Deep Red

September

Newest Everbearing Raspberry

Now you can plant a Raspberry that will produce an abundant crop in June and a crop of equal size in September. Fruit comes earlier and is larger, and of better quality than any other Raspberry.

Developed and introduced by Prof. George L. Slate of the New York State Experiment Station. (See pages 30 and 31.) This station has long been known for its leadership in developing new and successful fruits.

Ripens 2 to 4 weeks ahead of other varieties in the fall. The berries are firm and don't crumble.

Order the New Raspberry Today—Our Supply is Definitely Limited.

Red Rich

The Champion of All Everbearing Strawberries

Plant Patent No. 993

Here at last is the Strawberry that's a real sensation. A one-in-a-million chance seedling. Enjoys all the finest qualities known to Strawberry plants. **READ WHAT UNIVERSITY REPORT SAYS:**

Quote: "Of the 29 everbearing varieties we tested here last season Red Rich is by far the best. I think it is the everbearer for which we have been waiting. (Signed) Herchel L. Boll, Assistant in Pomology, Agriculture Dept., University of Illinois."

BEARS ALL SUMMER—gives you luscious, honey sweet Strawberries all summer long throughout the fall until winter freeze. **MAMMOTH PLANTS—HUGE BERRIES**, we've never seen plants so big and strong. This means disease resistant strength and enormous yields.

PLANT BY NEW METHOD, WONDERFUL YIELDS. Each Red Rich plant shipment carries new "Space System" planting instructions. Follow carefully and get up to a pint per plant the first year and up to a quart per plant the second. Fewer plants needed—25 plants per person is plenty.

TOPS FOR FREEZING. Slice one. They're red clear through. Plenty of natural sugar and a firm texture that holds shape when thawed. Wonderful winter desserts.

WE PREPAY POSTAGE.
